HOUSE PASSES LOCAL HARBOR ACT

HERBERT FAHY, RECORD FLIER, BADLY HURT IN CRASH

'ROUND 'N' 'ROUND

Now is the time of the year when the office boy sings: "When ibs sprig tibe id the Rockies."

* * * *

Which all reminds us that this is unusual weather for the bay region.

* * * *

Remarkable how these alleged wise-cracks spread. The newest one is, "If you don't like it, sue me."

* * * *

The first hundred times you hear that expression it sounds clever.

* * * *

About the third hundredth time, you're willing to reduce the alleged wise-cracker to dust.

* * * *

Another old one which is revived every day is, "Can I quote you on that?" There should be a law.

* * * *

Isn't the radio the marvel of the age? Quite right.

* * * *

Tune in an eastern station and you bring in "Spring Time in the Rockies" just as plain as anything.

* * * *

Tune in Australia and the sweet strains of "Spring Time in the Rockies" mixed with static comes to your ears.

* * * *

Now switch to the southern states and you can bring in that powerful station at Shreveport, La., and hear the Happy Hoople Boys playing "Spring Time in the Rockies."

* * * *

Then tune in a Canadian station and listen to the Royal Six playing "Spring Time in the Rockies."

* * * *

At last we are home. Tune in a station in the bay region and settle down in your easy chair to listen to that old, sweet, favorite, "Spring Time in the Rockies."

* * * *

Another song which is getting rather tiresome, to say the least is the "Maine Stein Song" which was revived by Rudy Vallee.

* * * *

One cannot deny that this song has a haunting melody to it that is peppy.

* * * *

But constant playing of the piece will soon send it down the long, long trail with "My Blue Heaven," "Sonny Boy," and those other melodies we hummed in the bathtub and forgot a few days later.

YESTERDAY IN CONGRESS

SENATE—

Harris immigration bill was recommited to immigration committee after three weeks debate on the easure.

Lobby committee concluded investigation of association against the prohibition amendment and adjourned until Tuesday.

War department appropriations bill carrying $456,320,864 was reported by committee.

Judiciary committee unanimously approved bill transferring prohibition enforcement from treasury to justice department.

Agreed to let House consider conference report on tariff bill ahead of the Senate.

Three Democrats warned that unless finance committee acts promptly on veteran's compensation bill, a fight will be started on the floor.

HOUSE—

Passed and sent to Senate the rivers and harbors bill carrying about $110,000,000.

Winged R Girls Postpone Party

The Winged R Girls of Richmond Union high school did not hold their scheduled beach party yesterday because of inclement weather.

No future date has yet been set for the affair.

MRS. FAHY ESCAPES HURTS

ROSCOMMON, Mich., April 25.—(UP)—Herbert J. Fahy, nationally known aviator and holder of the world's solo endurance flight record, was injured critically near here today, when his plane crashed to the ground in a tail spin.

His wife, Claire, well known California aviatrix, was riding with him. She escaped unhurt.

Fahy was taking a plane from the Detroit Aircraft Corporation to demonstrate it to Cliff Durant, noted automobile racer, who lives near here whenn the accident occurred.

No Hope

Physicians said Fahy had little chance of recovery.

Fahy's hurts included a possible fractured skull and internal injuries, the physicians said.

Mrs. Fahy's escape almost uninjured except for a few scratches was called miraculous by those who witnessed the plane's dive earthward from an altitude of but a few hundred feet.

Ship Low

The ship was flying so low, the witnesses added, that it was impossible for either Fahy or his wife to jump with parachutes.

Mrs. Fahy was innocoherent after the crash. The same physicians who treated her husband, said it was unadvisable to question her until she had recovered somewhat from the shock she had received.

Officials of the Detroit factory, advised of Fahy's smashup, were reported on the way here to examine the wreckage and determinn, if possible, the cause of the accident.

Fahy, who is chief test pilot for the Lockheed - Vega Aircraft corporation, of Los Angeles, is one of the best known aviators in the Uninted States. He was in Michigan after attending the Detroit airplane show, when he volunteered to take the ship to Durant's home, associates said.

2 HURT IN AUTO CRASH

Mrs, Katherine Glass, 733 Nineteenth street, sustained slight injuries, and a companion in her car, Mrs. Phillis Hansley, 456 Thirty-seventh street, received a sprained back and injured knee, in an automobile collision Thursday night.

According to police reports, the accident occurred at Coutting boulevard and San Pablo avenue, between cars driven by Mrs. Glass and C. Beviridge, 3531 Thirteenth avenue, Oakland.

Hearing Set For Slough Dredging

May 5 has been set as the last date for receiving protests against the dredging of a shipping canal in Ellis slough on the Richmond inner harbor, by Maj. E. H. Ropes, United States river and harbors engineer.

The contract for dredging the canal has been awarded to the San Francisco Bridge company, which will form a canal 300 feet wide, 4000 feet long and 30 feet deep, with a turning basin at the end, according to the plans.

In making his announcement, Major Ropes declared protests must be confined to navigation features only.

Autos Collide Without Damage

A slight accident was reported last night by police at the intersections of Ripley avenue and Ninth street, when the automobiles of L. M. Nobles, 712 Gridley avenue, and John Barries P. O. Box 1384 Richmond collided. No one was injured and damage to the machines was nominal.

Aids Richmond Firemen's Ball

MISS EDITH WALKER, of Richmond, who is aiding the Richmond Fire Department in preparing for its Eleventh Annual Ball, which will be held tonight at East Shore Park.

FIREMEN TO DANCE TONIGHT

Mayor Al Paulsen and his daughter will lead the grand march at the 11th Annual ball given by the Richmond Firemen's Fund of the Richmond Fire department tonight at East Shore park.

This yearly event is always one of the outstanding dances of the year and this year it promises to outshine the past ones. The big bell covered with carnations will be there and during the dance the carnations will be distributed as usual.

The merchants have reported that their supply of polish has been depleted and anyone passing the firehouses can see the reason. The firemen for the last week have been polishing up the buttons on their uniforms and this alone promises to be dazzling in itself.

There will be two prizes to be given away. Two five dollar merchandise orders have been donated one by Breuners Furniture store on Tenth street and one by Schanlankers Jewelry store on Macdonald near Sixth.

The refreshment stand will be in charge of the members of the Firemen's baseball team and they

(Continued on Page 8)

L. A. "Bombed" By 125 Army Planes

LOS ANGELESS, April 25.—UP—Los Angeles was "bombed" tonight by 125 fighters of the sky, the planes converging from the bases established a few hours earlier.

The sham attack on the downtown distirct was made by the provisional wing of the United States Air Corps while the city was illuminated from Signal Hill to Newhall pass by powerful parachute flares.

The attack was preceded by a flight of three observation ships, whose wings are equipped with ever changing colored lights. Then the bombers with their flares and "deadly missiles" destroyed the business district.

Rent Collector In County Jail

MARTINEZ, April 25.—Roy E. Millikan of San Francisco is in the county jail today, charged with having pocketed $35 rent he collected on a home at Bay Point owned by Mrs. Jeanette B. Donnell. Mrs. Donnell claims Millikan is occupying one of the two homes she owns in Bay Point, and she asked him to collect the rent from the other. She alleges that Millikan kept the money and then moved to San Francisco.

FUNERALS TO BE HELD TODAY

LAGUNA BEACH, April 25. — (UP)—The conclusion of a tragedy that stirred Laguna Beach was reached late today when a coroner's jury decided that Mrs. Guy Bates Post ended her own life, after shooting to death her close friend, Mrs. Doris Murray Palmer.

The verdict was reached at a brief hearing conducted 24 hours after the bodies of the two women were found in Mrs. Palmer's bungalow in the art colony here.

Substantiating the police theory that Mrs. Palmer was shot because she started to leave the house to attend a lunncheon at which Mrs. Post did not wish her to be present, was the testimony of Dr. B. B. Mason.

Very Nervous

Dr. Mason said that Mrs. Post's mother, Mrs. J. B. Poltd, told him that her daughter was high strung, nervous and was subject to sudden spells of violent anger. He told of being called when the bodies were found.

Herman Zahle, Orange county identification expert, said that there were no fingerprints on the pearl handled revolver, from which four shots had been fired. The weapon had lain beneath Mrs. Post's body and it was thought that the warmth had removed them.

Earlier, deputy sheriffs had pictured two hours' terror, believed to have elapsed between each of the shootings. Mrs. Palmer was struck by two of three bullets fired at her, once in the back and one in the head. Falling toward the source of the shots, the pretty divorcee dropped near the windows that look out on the greenish waters of the Pacific Ocean.

Walked Outside.

Mrs. Post was horror stricken, investigators decided, and knelt beside the dead woman, chafing

(Continued on Page 8)

CHEST DEBATED AT S.A. MEET

The community chest project was discussed yesterday at a meeting of the advisory board of the Salvation Army at the offices of T. H. DeLap.

No action was taken upon the matter until a committee of businessmen and women who are studying the project make their report.

It was decided at a recent mass meeting here that Richmond should have a community chest. A large number of local organizations sent delegates to the meeting and each urged that the chest project be taken up.

DeLap was in charge of the board meeting yesterday.

Wesley Group Hears Dr. Heady

Dr. James Heady was the main speaker last evening at a meeting of the Wesley Men's Brotherhood with "Choosing a Vocation" as his topic..

"When a man wakes up in the morning, eager for work, then he is in the business for which he is best adapted," the doctor declared.

A dinner was served in conjunction with the program.

Charles Wolfe and Tsar Calfee were appointed as a committee to arrange the next mteting of the Brotherhood, which will be held on May 16.

Mrs. Bennett, Son, Home From Hospital

Mrs. Prmus Bennett, wife of the pastor of the First Christian church here, and her little son, Donald Alan, have returned to their home from the Cottage hospital, where the newcomer arrived.

Anniversary Observed

MILLIONS OF Japanese recently celebrated the complete reconstruction of Tokio, which was destroyed by an earthquake. This photo was snapped at Tokio.

CENSUS HERE NEARS FINISH

According to a report received here yesterday, the census in Richmond will probably end today or Monday.

During the past two or three days, a number of names have been turned in, and the count has passed the 20,000 mark.

The census in West Richmond proved to be a disappointment as the official figures for that district gave the number of residents as only 1500.

City officials had believed that the count would be over the 2000 mark. Efforts are being made to have the district thoroughly rechecked.

Officials still have hope that the count will pass the 21,000 mark. However, this seems rather doubtful at this time.

When the census ends, a check will be made and the official figures will be announced.

In the meantime enumerators in this district are making their final check-up.

Meek Will Head Tour Of County

MARTINEZ, April 25.—Headed by Bert Meek, director of the State department of public works, the entire personnel of the California highway commission will visit Contra Costa county May 23, to inspect the Tunnel highway.

The inspection is part of a program for inclusion of the road in the state system, in the event any new highways are taken under the state jurisdiction and maintenance through action of the 1931 legislature.

Berman Wins Stay In Prison

SEATTLE, Wash., April 25.—UP—Superior Judge William Steinert ruled late today that federal authorities had prior claim to Jacob Berman and the Julian Petroleum corporation figure was immediately placed in custody of the U. S. marshall for committment to McNeil island penitentiary.

Decision was reached in a hearing while Los Angeles authorities were said to be flying north in an effort to return Berman to southern California to answer further charges in connection with the collapse of the big oil corporation.

FORGER HELD

SAN FRANCISCO, April 25.—UP Jack Barnes, 25, faced police questioning today in connection with an attempt to pass a forged $8600 check on Thursday.

PROGRAM FOR BETTER HOMES WEEK TOLD

Better homes for Richmond will be the purpose of the program to be put on next week by the Merchants' association, the chamber of commerce and other civic bodies, under the chairmanship of Mrs. C. F. DeShields.

The "Better Homes Week" is a national movement, sponsored by the Washington officials. The Federated clubs and Parent Teachers' associations are among the principal backers of the idea in Richmond. Headquarters have been established at the Odd Fellows hall, 333 Tenth street.

An ideal home, of four rooms, each furnished by a furniture dealer of the city, will be placed in the Odd Fellows building. The home, which, of course, will be without a roof, will be furnished by the following furniture houses:

Living room—L. H. Schrader company.

Dining room—Central Furniture company.

Kitchen—Breuners.

Bed room— Montgomery-Ward company.

Various attractive booths will be furnished by local firms and by

(Continued on Page 3)

RAIN FORECAST FOR WEEKEND

Rain which yesterday struck the north coast, is expected to spread over the entire state today, according to the state Weather Bureau.

Southeast storm warnings were hoisted last night from Point Reyes to Marshfield, and small craft warnings were issued in the San Francisco bay regions and from Marshfield north to Fuget Sound.

Business In State Improves

DEL MONTE, April 25.—UP—Encouraging reports from the various districts of California indicated a definite upward trend in general business conditions at today's monthly meeting of the California State Chamber of Commerce directors here.

Conditions right now were showing rapid improvement and the present depression was speedily approaching its end, according to a report submitted by the regional directors of the organization.

CHURCH HOTEL

SAN FRANCISCO, April 25.—UP—San Francisco is to have another church hotel.

A building permit for a six-story church and hotel apartment block, was applied for today by the Glide Foundation.

CHURCHES MEET HERE

Milo J. Smith, state secretary of the Missionary society of California North, was the principal speaker at the Bay District Convention of Christian Churches at the First Christian Church last night, talking on "The Power of the Pentecost."

The Pentecost will be celebrated by churches of all denominations on June 9th, as the 1900th birthday of the church.

The address was preceded by a dinner prepared by local women. Motion pictures of Lake Sequoia were shown by younger members of the church.

Among the visiting ministers to give short talks during the afternoon was the Rev. L. H. Bennett, brother of the pastor of the Richmond First Christian church. Rev. Bennett, pastor of the church at Fortuna, Cal., spoke in place of Rev. H. P. Shaw, of San Francisco.

Other pastors to address the convention were: Rev. Frank Ford, Alameda; Rev. Earl N. Griggs, Berkeley; Rev. R. C. Davis, Concord; Rev. C. W. Taber, Elmhurst; Rev. Galen Lee Rose, Fruitvale; Rev. J. A. Shoptaugh, Hayward; Rev. H. O. Breeden, Mills Terrace; Rev. W. J. Reagor, Oakland; Rev. L. I. Chamlee, San Francisco; Rev. Charles Mobley, Vallejo, and Rev. Primus Bennett Richmond.

Rev. Primus Bennett opened the morning session with devotionals.

An open forum and group conferences were another feature of the evening exercises.

Attendance at the conference was satisfactory, it was reported.

Contract For School Delayed

Martinez, April 25.—With four of 17 bidders within $3500 of each other, the award of a contract for construction of the Martinez junior high school was deferred until next Tuesday , at a meeting of the board of trustees of the Alhambra high school last night.

The four bids will be considered by the board, and the contract awarded to the contractor deemed most suitable.

Rotary Club Hears Talk By Major Kranz

The Richmond Rotary club was yesterday addressed by Major Kranz of the Salvation Army, who told of the work the Army is doing for civilization.

He also declared the Army had done much to combat the ever present Bolshevik tendencies in the larger cities, and cited examples of his own life in Germany. Attorney T. H. DeLap was chairman of the day.

SENATE TO ACT ON BILL

Final action of the Omnibus rivers and harbors bill, which includes an appropriation of $313,000 for Richmond harbor, was taken by the House yesterday at Washington, according to United Press dispatches received here.

The bill provides for $1,860,000 for work to be done in the bay regions.

The bill was passed by the House and was then sent to the Senate. A motion to send the bill back to the House, was defeated by a close vote.

This was the first rivers and harbors bill to be acted upon in three years, and the demands have been heavy.

What action the senate will take upon the bill is not known, but it is expected that the bill will receive final action within a short time.

The project will relieve the City of Richmond of the cost of maintaining the channel at a depth of 30 feet, as it has been required to do since the deeper channl was dredged two years ago.

Recently, when it was announced that the bill would be taken up in the house, Mayor A. L. Paulsen telegraphed Congressman Albert E. Carter of Oakland, expressing the appreciation of the city.

In reply, Congressman Carter said that the real credit for the proposition should go to Congressman C. F. Curry of this district.

YOUTH HURT AT POOL

Eiles Johnson, 23, of Oakland, suffered a deep one-inch gash on his head yesterday evening while swimming in the Richmond natatorium. A diver, name unknown, leaped from the edge of the pool, striking Johnson with his knee.

Johnson was removed to the Richmond Emergency hospital, where his injuries were said to be not serious.

Traffic At School Debated

The traffic situation on Twenty-third street, at Richmond union high school, was discussed yesterday by Principal B. X. Tucker at an assembly of Richmond Union high school pupils. Tucker presented a primary report prepared by the student traffic committee of the high school.

Almost 12 suggestions were offered in the committee report for the regulation of traffic in the vicinity of the school. The committee recommended the placing of "go slow" and "stop" signs at the entrance to the school's parking space, the supervision of the zone outside the school by a traffic officer, the widening and deepening of a ditch at the entrance to the school grounds and the organization of a student traffic corps. The latter idea is in operation by many of the schools of the Eastbay. No action was taken on the matter yesterday.

A school dance to be held on May 9 was announced at yesterday's student assembly. The transfer of $25 from the girls' athletic fund to the social fund was made yesterday for the purpose of financing the dance.

Byron Young, president of the high school student body, presided yesterday.

RANDALL HOME

W. K. Randall, 620 Eighth street, has been removed to his home from a San Francisco hospital where he has been undergoing treatment for two weeks.

CARQUINEZ ARRIVALS

J. T. Wesley of San Francisco registered at the Hotel Carquinez yesterday.

THE WOMAN OF IT

By Marguerite Mooers Marshall

Copyright Press Publishing Company (New York World) 1930

Women in the Headlines—Old and New

TRUTH isn't always at the bottom of a well: sometimes it's in newspaper headlines which they who run may read. We think that the truth about women—new style and old style—is dramatically epitomized in the headlines on two stories which have just been occupying a good bit of the front page. What could more perfectly illustrate the contrast between the woman of yesterday and the woman of to-day than the following:

MARGUERITE MOOERS MARSHALL

Mrs. McCormick May Be First Woman-Elect to U. S. Senate Seat.

Grandma Gets $25,000 Verdict in Her Love Suit

Here you have, on the one hand, in Ruth Hanna McCormick, an admirable type of truly modern woman. She is as devoted mother as she was devoted wife, when her husband was alive; she has kept all the old values of womanhood. Yet, forging ahead under her own steam, she has won the Republican nomination for Senator from Illinois by a majority of 200,000 over her male opponent. In politics she has asked no favors and acknowledged no handicaps—because she was a woman. She has fought with intelligence and indomitable energy such a battle as no woman before her ever came near winning, and few have even attempted.

We personally do not agree with Mrs. McCormick either about the World Court or about Prohibition. But we are enormously proud of her as a brilliant, forceful justification of the feminist faith that a woman should have the same political rights and opportunities as a man, that a woman can use them as well as a man, that a woman can succeed through what is in her and without any of the old humiliating gestures in the direction of man.

GAZE on that picture, as Hamlet remarked, then on this—the picture of the grandma prosecuting successfully a suit for breach of promise. It is obvious that the jury of men which awarded her $25,000 believed her pathetic plea that her age precluded her from another marriage and that the shock of the broken engagement had brought on a physical and mental breakdown from which she will never recover.

We are not voicing personal criticism of the heroine of this particular case. She merely carries to a logical conclusion the attitude which women have taken in effect for generations.

Not every jilted lady has asked financial damages of a quarter million or so, but when she hasn't asked for them, she often has assumed tacitly that the blow from which she is suffering is so severe that no mere money can compensate.

Please do not think we are mocking at the woman disappointed in love. When the love is genuine she suffers, she always will suffer. But we, who believe in the modern woman, believe that less and less frequently will she, even when jilted, accept the premises of the grandma who sued for breach of promise—to wit, that her chances of marriage are gone and that she must drag through the remainder of her days a blighted being.

JUST as Ruth Hanna McCormick asks only for a fair field and no favor in politics, so the truly representative woman of to-day and of to-morrow will ask only for a fair field and no favor in love. She will not stress her weakness and demand special compensation for it. She will learn—if she has not learned—to take her jiltings like a man and not to cry, in public anyhow, over spilt milk.

Nobody believes that, if the winner in the Illinois primaries had been a loser, she would have whined and wailed that she was a woman and men had no right to treat her so! We like to think that the sane feminist with a sense of justice will be just as tough-minded in love affairs as in political affairs—tough-minded doesn't mean "hard-boiled" but is merely a condition of courageous self-respect.

This type of new woman, when love or marriage goes wrong, will say to herself, honestly but bravely: "I feel terribly now, but I shan't always feel so—there are other things in life and I'm going to get some of them." She'll never ask heart balm—and as for alimony, she'll be likely to say what one modern wife actually did say, last week in Albany: "No, thank you—I can earn more than he can!"

HOSPITALIGRAM

I wonder why I'm lying on this narrow little bed,
When I had planned a party for my pals and friends instead.

I wonder why I'm left here at the mercy of a nurse
Who looks at me so coldly when my troubles I rehearse.

I feel it simply galling to obey each silly rule,
I'm often as rebellious as a naughty child at school.

If I am here to rest and gain, why wake me up at five
To make me wash and clean my teeth—how will that make me thrive?

If I doze off at any hour, why must they always wake
Me up and poke things in my mouth, my temperature to take?

I wonder why they're noisiest from five A. M. to eight,
When I would like to snooze some more, perhaps recuperate?

I wonder why I'm grumbling, on this narrow little bed,
When I ought to feel so happy that I'm getting well, instead?

ESTHER L. SCHWARTZ.

Of How Much Were U. S. Men Swindled in 1929?

U. S. Women Swindled of $700,000,000 in 1929.—*Headline.*

Maybe they were, but Keyes Winter, for years Assistant Attorney General in charge of the Fraud Prevention Bureau in New York, once told us: "The common assumption that women are more 'easy' than men has no basis in fact, so far as my observation goes. There seems to be no sex in suckers."

WARNING

I like to make you laugh
Because it's seldom that I hear it;
I like to make you frown
Because I never, never fear it;
I'd like to make you love
Because I've often heard you jeer it—
And you had better watch your step,
Because you're very near it!

ESTHER VALCK GEORGNS.

THE MAN OF IT

A Hoboken man has just died at one hundred and nine, a victim of smoking in bed. But lots of other men are going to say that if it takes one hundred and nine years for the habit to get them, they'll continue to take a chance!

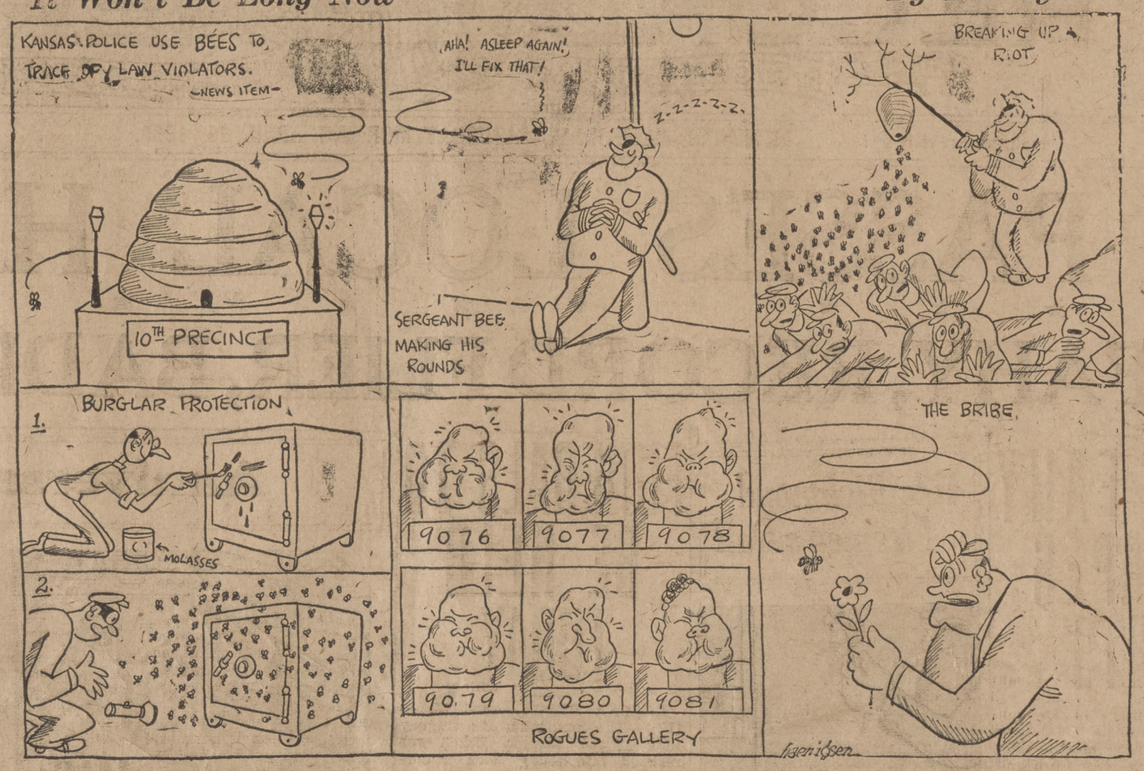
Renovating Furniture

MRS. A. has decided she needs new dining room furniture, so the fumed oak suite is being relegated to the bungalow, and here is what she is doing with it:

She bought a good black lacquer paint and after removing the varnish she painted each piece black. She put on a stencil design in red, green and a bit of yellow, then she experimented with the leather seats and discovered they took the lacquer paint beautifully, so she is painting them a bright red, and the nail heads she is going to paint with gold paint. With harmonizing hangings and rug she is going to have a cheery dining room in her summer home.

Last summer she converted an old bird's-eye maple bedroom suite into a charming set by using light gray lacquer enamel (this dries in about fifteen minutes) and applying decalcomanias as the decorative touch of color.

It Won't Be Long Now - - - - - - - - - By Haenigsen



You Can Do It for Yourself

By Clarissa Moore

Copyright Press Publishing Company (New York World) 1930

II.—The Suit to Be Remodeled

NO, IT IS not necessary to scrap every single stitch of last year's wardrobe in order to meet the new styles becomingly. It isn't quite so bad as that, although many an authority is so insisting, and where economy is neither necessary nor desirable, it undoubtedly is advisable to eliminate all thought of the old, and confine one's self to lovely new things, fresh from exclusive shops.

But to many of us economy happens to be more or less of a necessity, and we may as well make a virtue of it, somehow, even though it does seem, on the surface of it, utterly impossible to reconcile any of last year's clothes with those of this spring.

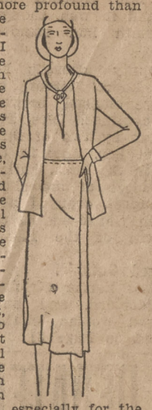
First, about a suit. You simply must have one, and suits always cost, so isn't there something that can be salvaged from last year, cleaned and made to look like $50? One girl I know—she is always chic, and incidentally, though few of her friends know it, makes all of her own clothes, even to her hats—is making several suits from last year's dresses.

One she is wearing now is black chiffon velvet, erstwhile a two-piece afternoon dress. She separated the blouse and skirt part, let down the hem of the latter, which fortunately was deep enough to make the required new length of fifteen inches from the ground, and still allow for a three-inch hem. Otherwise she would have let the entire hem into the length and have substituted a facing of silk or cotton.

Then she turned the skirt into a wrap-around affair, fitting it rather snugly over the hips and in at the waistline and turned a hem at the top so that she could wear it with a tuck-in waist. The blouse part of the velvet dress, of course, answers to the call of the jacket, and this merely by slashing up the centre-front, turning back the edges to form a tuxedo effect and lining the whole with green crepe de chine.

As originally the neck was a bateau effect, it was necessary to take in the shoulder seam a trifle deeper, but that, she said, was easily done and did not necessitate taking out the sleeve, although it might in some instances. At the wrists the green of the lining was brought up over the velvet to form a tiny cuff, and at the neck she draped a scarf of the green crepe which ties nonchalantly with long ends.

With this goes a blouse fashioned of the same green crepe de Chine. And shall I impart to you a secret about this crepe even more profound than that about the source of the velvet for the suit? I shall, because the idea is well worth passing on. Once upon a time, some two or three years ago, this same crepe de chine was black and white, and while perfectly good, it had been sent to the cleaners several times and was about ready to be discarded altogether. But casting about for material to complete this velvet outfit, this dress came to light. Who but this resourceful friend of mine would have seen the possibilities in it? Who, indeed, especially for the purpose in hand.



She ripped it up, it seems, washed it thoroughly, and by boiling it in a certain solution that comes for the purpose, she removed all the black from the cloth, leaving it a sort of ecru tint. Then she washed it again and dyed it green. It took a lovely leafy tone, simply luscious-looking with the black velvet suit.

Of course any material suitable for street wear will answer the purpose. The point is to have a suit, for, to repeat myself, suits are essential if you are to be entirely within the pale of fashion this spring. Velvet, though, is peculiarly appropriate for this between season period, and particularly practicable in that it is either formal or informal, as you please; that is to say, all-round suitable.

However, if you happen not to have on hand the velvet to put to the purpose described, perhaps you have a flannel dress or a tweed. The latter, as you know, is tremendously in harmony with the new styles—one of its pet idiosyncrasies—and flannel or tweed or any worsted can be treated in the same manner in which my young friend made use of her black velvet and her old crepe de Chine.

Be painstaking about the finishing because a suit shows up workmanship as no other type of apparel does, and another thing—try out the skirt length conscientiously before a full-length mirror. Especially with a suit, an inch or two makes a great deal of difference in relation to the jacket length.

Fashion dictates "three to five inches below the knees" for sports clothes, which allows plenty of leeway to avoid that certain ugly line of leg which every wise woman tries to elude. Be sure, therefore, to locate the exact right length for you, regardless. No longer, no shorter. In the matter of hems and facings they must be perfectly done, but I have already intimated as much, since these things are all a part of fine tailoring which "makes" suits, even though they are the feminine-looking suits of this year.

I had almost forgotten to say that the green blouse worn with the black velvet suit was given an extra touch and a clever idea it seemed. A jabot of the green made as a separate piece designed for wear upon occasion, was properly finished to be removable. A band of the black velvet gave it a striking and a rather more formal touch.

Oh, Go to Bed

By Eliot Kays Stone

Copyright Press Publishing Company (New York World) 1930

"DAD, why does a locomotive puff when it is standing still?"

"Because of an automatic air pump working to fill the tank with compressed air."

"Why is the automatic air pump working?"

"Because the putting on of the brakes to stop the engine and train has depleted the supply of compressed air in the tank."

"Why has the putting on of the brakes depleted the supply of air?"

"Because the brakes are worked by compressed air."

"How are the brakes worked by compressed air?"

"The air is released from the tank into a tube and the pressure of the air in the tube forces the brakes against the wheels."

"What's compressed air?"

"A volume of air pressed into a smaller space."

"How is it pressed into a small space?"

"By the automatic air pump."

"What's an air pump?"

"A pump for forcing air into a tank."

"How does it force air into a tank?"

"It sucks in the air from outdoors and forces it into the tank."

"Why does it force it into the tank?"

"So the tank will be full of air to put on the brakes."

"Why do they put on the brakes?"

"To stop the train at the station."

"Why does the locomotive puff when it is standing still?"

"Oh, go to bed."

PARIS, April.

Rolland And India

Having once written a "Life of Ghandi," in which the significant phrase occurs that in his estimation Ghandi represented "the greatest religious influence in the world since Jesus Christ," Romain Rolland has just published works on two other Hindu mystics: Vivekananda and Ramakrishna. Rolland seems fascinated by the philosophies of the East. There is nothing surprising in this, for the great masters of Greece and Egypt and Palestine were greatly influenced by thoughts and ideals from India and Persia. The curious part is that Rolland should be alone in studying India among European thinkers at a moment when all Europe seems fascinated, and obsessed even, by the two great spectacles on either side of her: America on the one side and Russia on the other. Most Europeans look upon what is going on either in Russia or in America as models to copy. Those countries reveal to them the form which the future is to take. Rolland alone looks at India. It seems to be the great man's destiny to be alone. But he himself chose that destiny. He was alone and his was the only voice that dared to speak at a moment when all of Europe was swept by what has since been called the war mentality. He was on the brink of glory and immortality. But he swept it away. He did not abandon his critical spirit and was truly like a voice crying in the wilderness. He has not yet reconquered the position he occupied in France in 1913. To the chauvinists, like Daudet and Bainville, he is still a traitor. There is, in fact, so much bitterness against him, that he has never returned yet from Switzerland where he went during the war.

* * *

Debunking History

Many of the most famous phrases and words of history, the wise cracks of Kings and potentates, were never pronounced by them, but are the work of journalists with a penchant for the picturesque. An iconoclastic French writer, M. Gaston Logan, has written an entire book to shatter such fond illusions as the grenadiers of Napoleon at Waterloo answering the English summons to surrender with a heroic: "The Guard dies but does not surrender." A journalist writing an account of the scrap that finished Napoleon for a Paris paper employed the phrase in the past tense. Louis XIV. never said: "The state it is I." He was a Bourbon and devoid of the slightest versatility, M. Logan affirms in telling what the Sun-King really did say upon that occasion, which fills three and a half pages. Then there was Francis I. with his: "All is lost except honor," after that bad day in Pavia. What Francis wrote to his mother was a lengthy epistle in which occurs the phrase: "My life was fortunately saved, I hope my honor also." Philip IV., fleeing after the Battle of Crecy, is supposed to have asked for asylum of the lord of Broyce Castle, and upon a question from the ramparts as to his identity to have answered proudly: "The fortunes of France." What he did say was pronounced in a whining tone and came down to this: "Please, mister, open the door; this is the unfortunate King of France." But M. Logan in his idol-smashing campaign cannot shake the "mots historiques" of Napoleon. It is true, of course, that Bonaparte never pronounced anything on the spur of the moment, but had his epigram makers constantly with him, who thought up the right thing to say at the right moment.

TELLING THE WORLD

By Neal O'Hara

Copyright Press Publishing Company (New York World) 1930

IN 500 WORDS FLAT

WRITING that 500-word history of the United States to be carved on the side of Mount Rushmore:

"What are you squirming about, Calvin?"

"I'm writing that 500-word history of the country, and it sure is wearing out my eraser."

"Where are you starting on the history, my dear?"

"Starting at the beginning, of course—with the Declaration of Independence."

"Are you mentioning life, liberty and pursuit of happiness?"

"Well, yes—but I hate to. Life and Liberty are the names of magazines. Wish I could work Cosmopolitan in there too.

"It must be difficult, Calvin, to tell the Nation's history in 500 words."

"Tain't for me. It's just the equivalent of ten night letters—the way I write 'em. By the way, Grace, look up how you spell eleemosynary, will you?"

"Yes, dear."

"If they heard I didn't know how to spell it, bet they'd start another boom to send me to Congress."

"I don't see why you want to use such a long word as eleemosynary anyway, Calvin."

"It'll put more stone cutters to work, won't it? That's reason enough."

* * *

"Are you going to write down anything about the early Indians?"

"Certainly am! I'm an honorary member of eleven tribes already, not to mention the lodge of Red Men."

"And, of course, you'll say something about George Washington."

"Sure will! He was a good Republican, wasn't he?"

"And you'll put in about the Revolution, the Civil War, the World War and all the other important upheavals, I suppose."

"Yes—and don't overlook that Boston police strike, either."

"Will there be room for all that, Calvin?"

"If there isn't, they can put up another mountain."

"Do you intend to give your opinion of the Whiskey Rebellion?"

"No. I think I'll save that for Ray Long. He pays better."

"How about mentioning the Louisiana Purchase?"

"Well the Government didn't get stuck, but still it was mostly Democratic territory. I'll probably leave it out."

* * *

"I think as long as it's a complete history of the country, Calvin, you should say something about the ordinary life of the people."

"I'm not only going to say something about the ordinary life, but I'd like to get in a few words about the twenty-year payment and the endowment policies too."

"I don't see how you can compress all those events. It must be hard to keep your wordage down."

"It isn't hard when you use my system. When I'm writing this I just imagine I'm in a Western Union office."

"You surely can't leave Abraham Lincoln out, either."

"Don't intend to. The only names I'm sure of leaving out are Fall and Daugherty."

"When does the manuscript have to be finished?"

"No time in particular. But I'm going to clean it up right away. I got the new house to pay for and I understand the magazines are in the market for more articles."

A DISH A DAY

By Karen Hollis

Copyright Press Publishing Company (New York World) 1930

As the weather becomes more mild there should be radical changes in the dinner menu, and one move of greatest importance is increasing the amount of vegetables served. It is of the utmost importance to vary the method of cooking; appetites lag in spring and must be catered to with pungent and alluring new dishes.

KAREN HOLLIS

Only the housewife who goes to market early and who has a generous household budget can procure green peas and asparagus nowadays. Not only are they high in price, but the supply is so limited that often by noon the market is sold out. There are many other vegetables, however, which have been available all winter, but which can be prepared in new ways and thus made attractive.

Stuffed cauliflower is a delicious dish that can be served at dinner with chops or fish or any light main course. It is also excellent as the piece de resistance at luncheon. Prepared as follows, it is tempting and nourishing.

STUFFED CAULIFLOWER

One head cauliflower
Two cups baked or fried ham, chopped fine
Five slices stale bread
One onion chopped
One tablespoon butter
One egg, beaten
One-half cup milk
One-half teaspoon celery salt

Wash a medium-sized head of cauliflower and remove the green leaves. Cook whole in boiling salted water for about twenty minutes. Remove from the fire, drain in a colander and allow to cool. While the cauliflower is cooking prepare the stuffing.

Pour cold water over the bread slices and after a minute or two squeeze them dry. Saute the onion in the butter and cook until slightly brown. Add the chopped ham and mix thoroughly with the onion. Mix with the bread and blend with the milk into which the beaten egg has been mixed. Add the celery, salt and a little white pepper if desired.

Place the cauliflower on a glass baking dish and force the stuffing between its sections. If any stuffing remains, pack it around the cauliflower. Dot with butter and bake in a moderate oven (350 degrees) for thirty minutes, or until slightly browned.

The Beauty Shop

By Frances Olivier

Copyright Press Publishing Company (New York World) 1930

Sticky Weather and Stickless Powder

THE muggy days will soon be here, the saddest time of year for oily skins. In fact, for any type of skin that cannot hold powder.

It is rather a sad time of year for oily hair, too, but more of that some other Monday, when we shall tell you in detail about a wonderful waterless shampoo for stubbornly oily hair.

FRANCES OLIVIER

Have you ever tried switching to compact powder when loose powder fails to hold? Cake powder is twice as adhesive as any type of loose powder, you know. It has to be in order to cake. And it comes in boudoir size as well as purse size, too. Perhaps a bit more expensive at the outset, but consider the quantities of loose powder an oily skin must use to get the effect of one layer of powder compact.

Perhaps the most usual method of coaxing loose powder to stick—if one simply must have loose powder—is to apply it over a foundation. But which sort of foundation? There are thin creams and lotions and thick pastes designed for the purpose, and then there are the well-known vanishing creams. But unless the vanishing cream is excellent or the user rather skilful in applying this type of foundation, the make-up is not calculated to be a success.

When vanishing cream is employed as a make-up base, one must not be generous with it nor hasty in applying. A very little goes a long way and that little must be spread over the skin thinly and evenly. As a rule, though, we are not in favor of it for oily, large-pored skin, for reasons obvious.

Porey, chronically shiny skin is much better off with a thin lotion as a make-up foundation. There is a variety of such lotions in the beauty market too. They may not be created exclusivery for foundation purposes, all of them. They may be designed primarily for chapped skin, but you will find that nearly all astringent tonics make excellent powder bases.

Here's one that you can make at home, if you be so minded, a lotion wonderfully suited to oily, stubbornly shiny skin.

Anti-Shine Tonic for the Skin

Camphor water ..... 1 pint
Glycerine ..... ½ ounce
Powdered borax ..... ¾ ounce

To the camphor water add the glycerine drop by drop, meanwhile stirring the two ingredients together thoroughly.

Next slowly pour the borax into the mixture, continuing the stirring. Now shake the lotion well, bottle and cork tightly. Always shake it before using.

This lotion should be used after the face is cleansed. Apply it by means of cotton pads or a soft cloth. Then powder. And just watch how the powder sticks!

The Farmer's Advice

By Alfalfa Smith

WHEN you are insulted these days, you KNOW you are insulted. There are professional insulters the same as there are professionals who set fire to buildings for a consideration.

Not only do you know you are being insulted, but the person who does it knows also.

We are living in a wonderful age—the age of specialists, and among them is the professional insulter.

Have you met up with him?

Tie Frocks

INSTEAD of a collar some frocks of shantung designed for spectator sports wear later in the season are brightened by big scarf ties of printed voile or marquisette. Those already in the shops are brought around the neck to tie in a huge bow at the centre of the V neckline, sometimes slipping through slashes along the neck of the blouse. The scarf tie is of color on a white or pastel frock. And also the handkerchief is of matching pattern in the sheer fabric. A red and white checked tie or scarf is very effective with a white shantung dress and white felt hat.

Have You Ever Thought—

That sealing wax makes an effective decoration for candles and is easily applied if dissolved in alcohol and put on with a brush?

Society NOTES

ODD FELLOWS, REBEKAHS, HOLD NATAL FETE

Nearly 300 members of the Odd Fellow and Rebekah lodges attended the 111th Anniversary celebration of Odd Fellowship in the Odd Fellow hall last night, which was held under the auspices of Eclipse Odd Fellows lodge of Richmond.

Members from the entire bay regions were present at the ceremonies, as well as many grand officers from as far as Pasadena.

Heading the grand officers was Hjilmer Johnson, grand master of the State of California, who made the principal speech of the evening.

Johnson based his talk on the history of the Odd Fellow lodges, and the benefits members received from their affiliations.

Other grand officers who were present and delivered brief talks were James Harris of San Francisco, grand treasurer; George Hudson of San Francisco; grand secretary, and Harry Morden, a trustee of the Odd Fellow and Rebekah orphans home at Gilroy.

Many Contra Costa county officials were present at the celebration, including Sheriff R. R. Veale of Martinez; Martin Joost, county tax collector, of Martinez; Jasper Wells, county clerk, of Martinez, and Aubrey Wilson, county coroner, of Richmond.

District officers of the Odd Fellow ladges were also present, and included Merlin Alberts, of Crockett, district deputy grand master; A. Jones, district deputy grand master of District 65; Ella Locke, district deputy president of Rebekah lodges, and Major. L. C. Mershom of Canton Diablo.

Aubrey Wilson, president of the Odd Fellows Hall association of Richmond, was chairman of the affair.

Interspersing the speeches, an interesting program was given.

Preceding the anniversary ceremonies a short business meeting of Contra Costa Encampment of Odd Fellows was held.

BAY VIEW GROVE WOODMEN CIRCLE TO HOLD DANCE

At the historic and picturesque old hacienda of the L. A. Wades in San Pablo, one of the most unusual dances of the year will be held, it was announced by officers of the Bay View Grove No. 10, Woodmen Circle.

The ranch house is near San Pablo, and is the former home of the famed Castro family, first pioneers of Contra Costa county.

The dance will be open to the pub ic.

For those who do not know where the Wade home is, a party has been arranged to leave the home of Mrs. E. A. Wallin, 663 Sixth street at eight o'clock this evening.

ADMIRAL DEWEY AUXILIARY, Spanish American War Veterans meet tonight at Memorial hall.

AUXILIARY TO DEWEY CAMP PLANS MEET

Plans to attend the department convention in Fresno May 11 to 14, were made at a meeting of the Admiral Dewey auxiliary to Spanish War Veterans in Memorial hall last night.

Several members of the auxiliary are planning to leave the day before the opening of the convention, and attend the institution of a new auxiliary in Tulare.

Following the business meeting last night, over which Mrs. Cora Rogers presided, a social evening of cards was enjoyed.

The committee in charge consisted of Mrs. Lucille Kister, Mrs. Caroline Grow, Mrs. J. F. Fitzgibbons, Miss Mary Jette, Mrs. A. T. Cramer and Mrs. W. V. Keltz.

C. C. TEMPLE PAYS HONOR TO MRS. M. PITZER

"Manager's Night" was observed by the C. C. Temple of Pythian Sisters in honor of the manager, Mrs. Mosetta Pitzer, at a meeting of the Temp'e in the Brotherhood hall last night.

A surprise banquet was served after the meeting, and Mrs. Pitzer was presented with a beautiful fernery for her new home.

The committee in charge of the banquet was composed of Mrs. Frances Michel, Mrs. Anna Bowyer and Mrs. Ruth Klick.

San Pablo Girl Returns From Trip

Following a transcontinental trip to Indiana and back, Miss Priscilla McGarrah of San Pablo has returned. The trip was made by automobile and Miss McGarrah was accompanied by her grandfather.

EAGLES GROUP NOMINATES NEW HEADS

New officers of the Point Richmond auxiliary to Eagles were nominated without opposition, at a meeting of the auxiliary in the Woodmen hall last night. Mrs. Regina Smith, president, presided over the meeting.

The officers nominated were: Mrs. Regina Smith, past president; Mrs. Louise DeBoil, president; Mrs. Clare Barry, vice president; Mrs. S. Callahan, chaplain; Mrs. C. Millani outside sentinal; Mrs. C. Cappitari, inside sentinal; Miss Marie Poinelli, secretary; Mrs. Etta Lite, treasurer; and Mrs. Viola McChristian, Mrs. Lena Feudner and Mrs. M. Adalini, trustees.

Election will be held May 9, and installation will be held shortly after.

May 9 was also decided upon as the date for observation of Mother's Day, and members of the committee in charge are hard at work making preparations for the affair.

GIANT SCHOOL PUPILS HOLD ENTERTAINMENT

Success marked the program given yesterday afternoon by pupils of the Giant school, belonging to the Sobrante Kind Deeds club. The entertainment presented entirely by the pupils, started with a one-act play, "Boys Who Knew Columbus", with Harvey McDowell, Jesse Gidley, Lee Felix and James Picklesimer.

This was followed by a movie presented by Ernest Durand, entitled "Three Bears." Lorraine Petric gave a piano solo and Florence Barulich, Jesse Gidley and Lee Felix sang.

The grammar grades of the Sobrante school participated in folk songs. Mother Goose singing games were given by the primary classes, and the program closed with serving of tea and cake.

Leslie Turley, Rhoda Spiersch, Elope To Reno

Leslie Turley, son of Mr. and Mrs. H. H. Turley, and Miss Rhoda Spiersch, daughter of Mr. and Mrs. Fred Spiersch, eloped to Reno and were married Thursday night, according to word received by their parents yesterday.

The couple had been engaged for some time, but had planned on a wedding in June.

The bride has resided with her mother in Walnut Creek, following the death of her father, the late Fred Spiersch.

Turley attended the local high school and is employed as a brick mason at the Standard Oil company.

Harmony Court, Order of Amaranth, To Seat Heads

Officers of Harmony Court, Order of Amaranth, will be installed at an open ceremony in the Masonic hall. The installation will be open to members and their friends.

Robert J. White, retiring patron, will act as installing officer, and will be assisted by Mrs. Gussie Narbett, installing marshal, and Mrs. Grace Cockerill and Mrs. Alma Dinphelt, assistant marshals.

Mrs. Minnie Phillips as royal matron and Aubrey Wilson as royal patron will head the list of officers to be installed.

Mrs. Max Henry Entertains Point Sewing Club

The Point Sewing club met yesterday afternoon at the home of Mrs. Max Henry, who was assisted as hostess by Mrs. Mary Moyle. A short business meeting was followed by whist and a social hour. The place of the next meeting was not decided.

William Masons Leave For Home

Mr. and Mrs. William Mason and daughter, will leave for their home in Chester Penn., today, following a visit in Berkeley.

Mrs. Deathe To Fete P. S. Sewing Club

The Richmond Temple of Pythian Sisters Sewing club will meet next Thursday at the home of Mrs. Geo. Deathe, 2412 Twenty-sixth street.

On The Screen

—under the glare of powerful lights and the stress of "Picture Making" the beauty rendered by Gouraud's Oriental Cream stands the test. It gives an alluring, pearly appearance that will not rub off, streak or spot.

No "touching up" necessary as the skin retains the delightfully soft, seductive beauty under all conditions.

EVANGELISTS Guy Renfrow and Leonard Rogers of the Full Gospel Church. Renfrow will speak at the Thursday night meeting of the Pentecostal Full Gospel church here.

M. W. A. CAMP ENTERTAINS AT SOCIAL

A stag social evening was held in Redmen hall last ninght by Richmond Camp, Modern Woodmen of America, following a short business meeting.

It was announced during the meeting that the lodge would go in a body to Alameda next Friday night to attend a general get-together of Eastbay camps.

At this time a banquet will be served and a program of entertainment provided. There will be no meeting in the local hall.

On May 14 the Eastbay council of Modern Woodmen will be held at Elmhurst camp, in Oakland.

The baseball team sponsored by the Eastbay Council, will play the Alameda Acorn in Alameda tomorrow, and many local members are planning to attend.

At a recent committee meeting of the council, tentative plans for a picnic to be held in the near future at Pinehurst was made. C. L. Neckel is delegate of the local camp to the committee.

Following the business meeting, a social evening of cards was held and refreshments were served under the direction of C. L. Neckel and Larry Hills.

NUI SEWING CLUB MEETS AT HOME OF MRS. WALKER

At the regular meeting of the Nui sewing club yesterday afternon Mrs. William Patterson was awarded the mystery package, and automatically was selected to furnish the package for the next meeting of the club.

The delightful social gathering was held at the home of Mrs. Louis Walker, 3001 Barrett avenue.

The next place of meeting was not selected.

Rev., Mrs. Bennett Entertains Guests

Guests of Rev. and Mrs. Primus Bennett are Mr. and Mrs. W. J. Allen and danughter Genevieve of Pacific Grove.

Mrs. Wallace Has Luncheon

Mrs. Kenneth B. Wallace yesterday entertained wives of Richmond ministers at luncheon. The group meets each month at the home of one of their number.

SHIPS SEARCH FOR 16 LOST SEAMEN

GREENWICH, Conn., April 25.—UP—Half a dozen power boats and two amphibian planes searched the shores of Long Island Sound today in a fruitless effort to find some trace of 16 seamen who were driven from the decks of a flame-swept freighter last night.

Little hope is held for the lives of the missing men and it is believed they perished in the choppy waters off the sound when their lifeboat was swamped. The boat capsized as it was dropped into the water from the burning freighter, the Thames.

Ten men were rescued after they had deserted the ship, nine having been picked up by a coast guard cutter and the tenth by an oyster boat.

The blackened hull of the freighter drifted onto a reef near the estate of J. K. Tod, near here.

Survivors said the flames flashed up like a broadsword, and that they barely had time to get over the deck rails. Haste in escaping from the burning vessel is believed to have resulted in the capsizing of one of the lifeboats.

Captain Robert Sherman, of the Thames, and eight members of the crew, were taken to Providence, R. I., on the Colonial liner Lexington, to which they had been transferred from a coast guard boat.

Clarence Tibbets, chief engineer of the freighter, came to Greenwich on an oyster boat commanded by Capt. George W. Wilson.

Upon docking here, Captain Wilson said that he believed the missing 16 men had been drowned. He said that a number of vessels, which stood by the burning freighter, might have saved their lives by using their searchlights.

"They put out a few lifeboats," he said, "but none of them would play their lights on the water, despite the cries for help which were sent up by the men floundering in the waves.

Coast guard ships were continuing their search of the sound tonight in the hope that the missing seamen may have righter their lifeboat and drifted asore.

Wales Prince Home Again

WINDSOR, Eng., April 25.—UP—The Prince of Wales — thin and brown after a 15-weeks trip to Central Africa—dined within the elaborate halls of Windsor castle tonight after a rapid flight from the Mediterranean on the last stage of his homeward journey.

The prince, whose plane landed in the great park at Windsor castle, was welcomed home by his brother, Prince George, whose hand he grasped as he doffed his fur coat and stepped from the plane.

Picking up his excited little Cairn terrier, Cora, the prince then joined his brother in the king's automobile and drove to Fort Belvedere where King George and Queen Mary were waiting for him. The fort recently was remodeled for the prince's residence. The king and queen welcomed their son.

Cell Doors Sell For Four Bits

NORTHAMPTON, England. — Cell doors from the Northamptonshire goal, which is being demolished, are selling for two shillings and sixpence, or about 50 cents.

200 WILL VISIT DAM

Nearly two hundred Richmond men and women who will visit Pardee dam tomorrow, will find the reservoir within a few feet of flowing over the spillway, according to a report by Frank W. Hanna, chief engineer and general manager of the East Bay Municipal Utility district.

The Mokelumne river has been running a torrent for the past month and the big reservoir has been increasing in height at the rate of more than two feet a day and is now less than ten feet from the spillway. The reservoir will be full to capacity and running over early in May, it was estimated by Hanna.

The Richmond delegation is under the guidance of Henry A. Johnston, Utility District Director, representing Richmond.

The party will leave Richmond in automobiles about eight o'clock Sunday morning, returning the same day. Frank W. Hanna, chief engineer and general manager of the district, will make a short talk, reviewing the history of the Utility district and explaining the present status of the water program. The meeting will be held at the District lodge.

Hanna's report showed that the local reservoirs of the district now hold more than five billion, six hundred and twenty-nine million gallons of water. The local reservoirs have gained only a little over sixty million gallons during the last two weeks, while the Pardee reservoir has been filling to the tune of billlions. The local storage will run the district for about five months while the storage in the mountain reservoir is now nearly sufficient for five years' supply.

MAN INJURED IN AUTO CRASH

William Jenkins, 3228 East 27th street, Fruitvale, was treated for a deep cut over his right eye by Dr. U. S. Abbott, at Abbott Emergency hospital, as the result of an accident at Ninth street and Macdonald avenue.

According to police report s Jenkins, while crossing the street, was struck by a car driven by Frank Muratore, 134 South Third street.

Muratore told police that he did not see Jenkins because of the rain.

Program For Better Homes Week Announced

(Continued From Page 1)

the local Parent Teachers' associations.

A free plant exchange will also be established, where all persons attending the exhibit may exchange plants with their neighbors.

Troops of Girl Scouts, Campfire Girls and Girl Reserves are invited to open a booth at the exhibit, selling candy or other merchandise, with the money to go into their own treasuries.

A "well baby clinic" will be another of the features of the week. Mothers entering children in the clinic are requested to furnish their own blankets, Mrs. De Shields said.

The week's program follows:

TUESDAY

Afternoon: 2:30—Keith Narbett. Architecture and Construction of the small home.

Evening: 8:00—Nora Purviance. Health in the Home.

WEDNESDAY

Afternoon: 2:30—Rev. A. A. Pratt. Character Building in the Home. Librarian to follow.

THURSDAY

Afternoon: 2:30 — Librarian. Books for Children.

Well Baby Clinic from 10:00 to 4:00.

Evening: 8:00—Miss Lucille Allen. Playthings for the Home and Yard. Miss Allen is of the Institute of Child Welfare of the University of California.

FRIDAY

Afternoon: 2:30—Speakers from the University of California. Home Gardens.

3:30—Miss A. Alvord from Long fellow high school Home dietetics

Evening: 3:30—Miss Nora Ashfield, ass't. supt. schools. Better cooperation between the school and the home.

BANK BANDIT OUTWITS PILOT

INDIANAPOLIS, Ind., April 25 (UP)—A wily bank bandit in an automobile outwitted an aviator today in a wild chase of motors across central Illinois.

The bandit ,one of two who had held up and robbed the Indianola State bank of $3,000, and kidnaped Cashier Harold Watkins,spied the airplane zooming after him.

He drove his car into a maze of traffic which looked like a procession of little black bugs from the air. The aviator, an unnamed Indianala youth who had offered to guide sheriff's posses along the bandit's trail, lost his track, and after circling the territory for several minutes, returned home.

The two bandits took Watkins to Vermilion Grove, where they kicked the cashier from their car. One of them stayed in it and sped north. The other entered another automobile and raced to the south. The aviator, evidently believing the money had not been transferred, followed the original car for about 20 miles, while wondering farmers witnessed the midwest's first airplane bandit chase.

San Jose Hit By $75,000 Blaze

SAN JOSE, April 25.—(UP)—A mattress factory and paint shop were demolished by fire today. The loss is estimated at $75,000. The fire is believed to have been started from spontaneous combustion in an adjacent furniture store in one of the two buildings which were destroyed.

Just An Old Western Custom

CHARLSS BICKFORD and Maria Alba in a scene from "Hell's Heroes," which is now being shown at the Fox-California theatre.

LIGHTS USED

Automobiles burn up 120,000,000 electric lamps a year, enough to light the city of New York, according to the California State Automobile association.

GHOST TOWN SHOWN IN FILM

Bodie, Cal., one of the famous "ghost cities" of the west, experienced a "boom" during the filming of Universal's all talking picture, 'Hell's Heroes," coming to the Fox-California theater today.

Bodie's few remaining inhabitants, numbered by tens where once they had totaled 11,000 blinked in amazement when they saw the streets thronged with strange men, horses and automobiles and heard the scund of hammers and saws where rotted sidewalks and dilapidated buildings were being repaired.

Then the influx to Bodie began. It had long been rumored that a big mining strike was imminent. From scores of miles around, stockmen, sheepmen, miners and prospectors flocked into Bodie, seeking a chance to strike it rich.

They found that the re-birth of Bodie was due to a Universal motion picture company, fixing up the town for the taking of scenes for "Hells' Heroes."

At first the gold-seekers didn't believe this. They thought the motion pictuer activity was a blind to cover up a rich "strike". Many hung arcund for days, waiting for developments. Numbers went to work for the motion picture company. Food ran low, and the company had to share its supplies with the newcomers.

At length Director William Wyler and his comany finished their work. Men and equipment departed. The gold-seekers convinced that the long awaited "strike" was still in the future, followed. Bodie sank back into its long sleep.

The notable cast of the picture includes Charles Bickford, Raymond Hatton, Fred Kohler, Fritzi Ridgeway, Maria Alba, Joe de La Cruz, Buck Connors and Walter James. It is based on Peter B. Kyne's famous story "The Three Godfathers," and was prepared for the screen by Tom Reed.

Also on the program is a talking comedy entitled, "Gentlemen of the Evening" and a cartoon.

"ALL QUIET" AT PRISON

COLUMBUS, O., April 25.—UP—With conditions rapidly approaching normalcy at the state prison here Attorney General Gilbert Bettman announced today that the report of his investigation of last Monday's disastrous fire in the west cell block, which claimed the lives of 322 convicts, will be placed in the hands of Gov. Myer Y. Cooper, Monday.

The outward show of rebellion on the part of prisoners since the fire had virtually disappeared today and order was maintained thruout the prison. Warden P. E. Thomas, whose administration has been under fire during the investigation said today that 550 are to be moved to other prisons within a few days in order to ameliorate congestion in the state prison.

The detachment of militia which has been on duty at the prison was reduced by 200 men tonight.

Death Climaxes Wedding Party

TRENTON, N. J. April 25.—UP—Death climaxed a gay wedding party here tonight.

Ulric Dahlgren, Jr., 29, son of a professor of biology of Princeton university was killed and his wife, Catherine, 26, was gravely injured when the automobile in which they were pursuing the bridal couple was struck by a train at a grade crossing.

The Dahlgren's had attended the marriage of Susanne W. Blackwell sister of Mrs. Dahlgren, and Wallace Thompson, Jr., and were following close behind the newlyweds when the tragedy occured.

Many Killed In Indian Rioting

LONDON, April 25.—UP—Varying death lists were reported today from the recent riot between Indians and troops at the strategic city of Peshawar, near the Afghan border.

An Exchange telegraph dispatch from Peshawar said one British soldier and approximately 20 rioters had been slain following the arrest of civil disobedience agitators Wednesday.

An earlier report quoted the Bombay congress committee as saying 52 persons had been killed and 30 wounded, with the victims mostly Pathans and Peshawar villagers.

Boy Goes To Rodeo Too Early

PENDLETON, Ore., April 25.—(UP)—Fifteen-year old Allen agner, son of an editor of the Los Angeles Express, arrived here with plans of becoming a real "top hand" in the Pendleton Round-Up. He found he was a bit too early with his ten gallon hat idea and is being held pending the arrival of his father from Los Angeles.

READ IT FIRST IN THE RECORD-HERALD

Ooh! Bandits

JOHN MACK BROWN, with the black mask, tells Joan Crawford that she is about to be kidnaped. Ricardo Cortez looks on. The scene is taken from "Montana Moon," which is to be shown at the Fox-California theatre tomorrow.

MONTANA MOON FEATURES SONG HIT

Metro-Galdwyn-Mayer will present Joan Crawford tomorrow at the Fox California theatre in "Montana Moon," a musical romance of the west. The story is an original by Sylvia Thalberg, and Frank Butler, and was directed by Malcolm St. Clair. Miss Crawford's supporting cast includes John Mack Brown, Dorothy Sebastian, Ricardo Cortez, Benny Rubin, Cliff Edwards, Karl Dane and Lyold Ingraham.

Information that this is one of first pictures to be filmed without the use of artificial scenery, all the exterior scenes being taken at a cattle ranch in the San Jacinto mountains, 200 miles north of Los Angeles. A large part of the extra cast was recruited from the cowboys employed on the ranch whose tricks in a way of of riding an unruly horse, lassoing cattle, etc., are said to be an important part in the production.

The story concerns a New York debutante who visits her father's extensive holdings in Montana, and falls in love with a cowboy. The conflict between their love and the disparity in their social positions forms the dramatic situation.

Advance reports have it that "Montana Moon" is by far the most lavish production in which Miss Crawford has yet appeared, particular stress having been laid on the wealth of scenic beauty on hand and the contrast between the Western locale and that of sophisticated Park Avenue environment with which the star has heretofore been almost exclusively associated.

On the same program with the feature picture is Fox Talking News and Lloyd Hamilton in "Grass Skirts."

Ships Warned of Big Ocean Storm

PORTLAND, April 25.—(UP)—A storm moving in from the coast caused the weather bureau today to order up warnings for small craft from Newport, Ore., to Tatoosh Island, and from Point Reyes, Cal., to Marshfield. Increasingly southerly winds becoming gales, were forecast along the southern Oregon and northern California coasts.

School Teacher, Friend, Jailed For Rustling

CHICAGO, April 25. —(UP)—Two pretty young women were arrested here today on charges of cattle rustling, preferred by Billings, Montana police.

Miss Marion Fleming, 19, school teacher, and Mrs. Ella Desndale, rooming house keeper, both of Billings, were placed in jail when Sheriff Bert Howard of Billings sent a four page telegram in which he enumerated their alleged crimes.

Most serious was the charge of absconding with an unbranded calf.

Mrs. Densdale said she took the calf in payment of a $15 rent debt from a roomer.

"They must set high store on calves out west," said Capt. John Egan, in ordering the two women held for Billings authorities.

Students, Reds, Riot in L. A.

LOS ANGELES, April 25.—UP—One student was injured and five alleged Communists were arrested when a group wearing Red banners attempted to carry their doctrines to Roosevelt high school today and succeeded only in causing a free for all fight.

When pleas of "throw away your school books and join the cause" were shouted, students grew angry and attempted to stop the invaders standing near the school doors. The students resorted to physical methods and the Red "defense" squad went into action. Police arrived in response to a riot call.

LEGAL NOTICES

NOTICE OF ELECTION FOR MEMBER OF THE BOARD OF EDUCATION

In accordance with the provisions of the Charter of the City of Richmond, County of Contra Costa, State of California, adopted and ratified by the qualified electors of said City on the 9th day of February, 1909 and thereafter approved by the Legislature of the State of California, and in pursuance of a Resolution passed and adopted by the Board of Education on the 18th day of March, 1930, providing for an election for member of the Board of Education for the City of Richmond and for Richmond School District of California on the third day of May, 1930, to which said Resolution reference is hereby made, notice is hereby given that an election for a member of the Board of Education in and for the City of Richmond and Richmond School District of California, will be held on the **Third Day of May, 1930**, for the election of a member of the Board of Education for a regular term of Six (6) years.

JESTON ORR FORD

By order of the Board of Education of the City of Richmond and of Richmond School District of Contra Costa County, California.

W. T. HELMS

Clerk of the Board of Education.

Publish April 25 Daily 7t.

IN THE MATTER OF ACQUISITION AND IMPROVEMENT DISTRICT NO. 3 OF THE COUNTY OF CONTRA COSTA. RESOLUTION OF INTENTION NO. 3.

BE IT RESOLVED, by the Board of Supervisors of the County of Contra Costa, State of California, as follows:

That the public interest and necessity require and that it is the intention of the Board of Supervisors of the County of Contra Costa, to order the following acquisitions for the widening of Lowell Avenue from Thirty-Sixth Street to San Pablo Avenue, and the widening of Thirty-Sixth Street from Lowell Avenue to Andrade Avenue, for public street purposes;

That the property necessary to be taken for such widening as aforesaid, includes all those certain parcels of land situate in the County of Contra Costa, State of California, described as follows, to-wit:

PARCEL ONE

Portion of Lot 99 as designated on the map entitled, "Map of the San Pablo Rancho, accompanying and forming a part of the final report of the Referees in Partition", which map was filed in the office of the Recorder of the County of Contra Costa, State of California on March 1, 1894, described as follows:

Beginning at the intersection of the southerly line of Lowell Avenue with the southwesterly line of San Pablo Avenue as designated on the map entitled, "Andrade Exposition Tract, Contra Costa Co., California", which map was filed in the office of the Recorder of the County of Contra Costa, State of California on September 8, 1911 in Volume 5 of Maps, at page 122; thence from said point of beginning South 89° 57' West along the southerly line of said Lowell Avenue, being thirty (30) feet southerly from the southerly line of Block 14 as designated on the said map of Andrade Exposition Tract, two hundred ninety-seven and 19/100 (297.19) feet to the easterly line of Thirty-Sixth Street (formerly Thirtieth Street) as designated on the said map of Andrade Exposition Tract; thence South 0° 13' West along the easterly line of Thirtysixth Street, being twenty-five (25) feet easterly from the easterly line of Blocks 10 and 11 of said Andrade Exposition Tract, four hundred eighty-two and 04/100 (482.04) feet to the northerly line of the parcel of land described in the deed from George Warren Anderson, et. ux. to Ambrose D. Fish, a single man, dated March 13, 1928 and recorded March 26, 1928 in Volume 128 of Official Records, at page 341; thence North 69° 10' East along the northerly line of said Fish Tract twenty-six and 79/100 (26.79) feet to a point which bears twenty-five (25) feet easterly, at right angles from the easterly line of said Thirty-sixth Street; thence North 0° 13' East parallel with and twenty-five (25) feet easterly at right angles from the easterly line of said Thirty-sixth Street four hundred forty-two and 54/100 (442.54) feet to a point which bears South 0° 13' West, sixty (60) feet from the northerly line of said Lowell Avenue; thence North 89° 57' East, two hundred eighty-three and 72/100 (283.72) feet parallel with and sixty (60) feet southerly at right angles from the northerly line of said Lowell Avenue, to the southwesterly line of San Pablo Avenue; thence North 20° 50' West, thirty-two and 09/100 (32.09) feet along the said southwesterly line of San Pablo Avenue to the point of beginning.

PARCEL TWO

Portion of Lot 99 as designated on the map entitled, "Map of the San Pablo Rancho, accompanying and forming a part of the final report of the Referees in Partition," which map was filed in the office of the Recorder of the County of Contra Costa, State of California on March 1, 1894, described as follows:

Beginning at the intersection of the northerly line of the parcel of land described in the deed from George Warren Anderson et.ux. to Ambrose D. Fish, a single man, dated March 13, 1928 and recorded March 26, 1928, in Volume 128 of Official Records, at page 341, with the easterly line of Thirty-sixth Street (formerly Thirtieth Street) as designated on the map entitled, "Andrade Exposition Tract, Contra Costa Co., California", which map was filed in the office of the Recorder of the County of Contra Costa, State of California on September 8,1911 in Volume 5 of Maps, at page 122; thence from said point of beginning South 0° 13' West along the easterly line of said street, forty-two and 96/100 (42.96) feet to the northerly line of Andrade Boulevard as designated on said map of Andrade Exposition Tract; thence North 89° 57' East along the northerly line of said Andrade Boulevard, twenty-five (25) feet; thence North 0° 13' East, fifty-two and 46/100 (52.46) feet parallel with the easterly line of said Thirty-sixth Street, to the northerly line of said Fish Tract (128 OR 341); thence South 69° 10' West, twenty-six and 79/100 (26.79) feet along the last named line to the point of beginning.

All of said property for the widening of Lowell avenue, shall now and hereafter be known as and become a part of Lowell Avenue, and all of said property for the widening of Thirty-sixth street shall now and hereafter be known as and become a part of Thirty-sixth street. Reference is hereby made to the specifications in the above entitled matter on file in the office of the County Clerk for all details in connection with the above described acquisitions and for the estimated expenses thereof;

That the public interest and necessity require and that it is the intention of the Board of Supervisors of the County of Contra Costa, State of California, to order the following work to be done and improvement to be made in said County of Contra Costa and within the corporate limits of the City of Richmond, to-wit:

That Lowell Avenue from San Pablo Avenue to Thirty-sixth street (formerly known as Thirtieth street), and Thirty-sixth street (formerly known as Thirtieth Street), from Lowell Avenue to Andrade Avenue (formerly known as Andrade Boulevard), including the intersection of said Thirty-sixth street with said Lowell Avenue as said street and avenue will exist after the acquisitions above referred to, within the limits and in the particular locations shown on the plans and specifications hereinafter referred to, be improved as follows:.

That said street and avenue be graded in the manner and locations shown on the plans and specifications hereinafter referred to, and to the grades and sub-grade elevations shown on the plans, profiles and detail drawings thereto, to all of which reference is hereby expressely made for a description of the grades to which all of the work and improvement under this Resolution shall be done, which said grades are hereby adopted and established as the official grades therefor.

That a Durite Asphaltic concrete pavement with a broken rock cushion be constructed in said street and avenue, of the width, the thickness and cross-section, in the manner and in the particular locations as all are more fully shown upon the plans and specifications hereinafter referred to.

That cement concrete curbs and gutters with curb bars, and cement concrete open drains be constructed in said street and avenue, in the manner, of the dimensions, to the grades, and in the particular locations as all are more fully shown on the plans and specifications hereinafter referred to.

That vitrified ironstone pipe sewers and brick and concrete manhole with cast iron rim and cover, and concrete and vitrified ironstone pipe lampholes with cast iron rims and covers be constructed in said street and avenue, in the manner, of the dimensions, to the grades, and in the particular locations as all are more fully shown on the plans and specifications hereinafter referred to.

All of said work and improvement shall be done to the lines and grades as shown on the plans and profiles and in accordance with the plans and specifications heretofore adopted for doing said work and improvement by said Board on the 7th day of April, 1930, and now on file in the office of the County Clerk of said County of Contra Costa. Said plans and specifications, and the profiles, detail drawings and diagrams accompanying the same are hereby expressly referred to for the estimated cost of said acquisition and improvement (inclusive of incidental expenses and costs of the proceedings), for a full and detailed description and location of said proposed acquisition and improvement, and of the grades to which said improvement is to be constructed. Notice is hereby given that all of the classes of work above enumerated are not to be constructed upon all portions of the street and avenue above described but only in the particular places and in the manner as shown on said plans and specifications.

All of said improvement shall include all intersections, terminations and opposite terminations occurring within the limits of the proposed work and improvement where shown on the plans but shall not be construed as doubling at any intersections.

The notice of all persons affected is directed to the grades for the proposed improvement and to the provisions of the Acquistion and Improvement Act of 1925 relating to grades.

Particular notice is directed to the fact that substantial changes in the relation of the elevation of abutting property to that of said street and avenue, as they will exist after being improved, will result from the construction of a portion of the above mentioned improvements to the proposed grades.

That the district of lands which will be benefited by said proposed acquisitions and improvements and upon which will be levied the assessment taxes to pay the costs and expenses thereof, which assessment district shall be known as "Acquisition and Improvement District No. 3," shall as proposed, include all that territory in the County of Contra Costa within the following described exterior boundary line, to-wit:

Beginning at the northeasterly corner of Lot 6, Block 14, as designated on the map entitled, "Map of the Andrade Exposition Tract, Contra Costa Co., California," which map was filed in the office of the Recorder of Contra Costa County, State of California, on September 8, 1911, in Volume 5 of Maps, at Page 122, and running thence in direct lines as follows: To the most northerly corner of Lot 101 as designated on the map entitled "Map of the San Pablo Rancho, accompanying and forming a part of the final report of the Referees in Partition," which map was filed in the office of the Recorder of Contra Costa County, State of California, on March 1, 1894; thence to the most westerly corner of said lot 101; thence to the most southerly corner of said Lot 101; thence to the most easterly corner of said Lot 101; thence to the intersection of the southwesterly line of San Pablo Avenue with the northerly line of Andrade Avenue (formerly Andrade boulevard); thence to the intersection of said northerly line of Andrade Avenue with the easterly line of Thirty-sixth Street (formerly Thirtieth Street); thence to the southwesterly corner of Lot 9, Block 11, said Andrade Exposition Tract; thence to the northwesterly corner of said Lot 9; thence to the southwesterly corner of Lot 34, said Block 11; thence to the northwesterly corner of Lot 1, Block 10, said Andrade Exposition Tract; thence to the southwesterly corner of Lot 42, Block 2, as designated on map entitled "Map of the Peres-Andrade Tract", which map was filed in the office of the Recorder of Contra Costa County, State of California, on May 21, 1908, in Volume 1 of Maps, at Page 22; thence to the southeasterly corner of Lot 1, said Block 2; thence to the southwesterly corner of last said Lot 1; thence to the northwesterly corner of Lot 6, Block 1, Peres-Andrade Tract; thence to the northeasterly corner of last said Lot 6; thence to the northwesterly corner of Lot 7, said Block 1; thence to the northeasterly corner of Lot 5, Block 14; aforesaid Andrade Exposition Tract; thence to the northwesterly corner of Lot 6, said Block 14; thence to the northeasterly corner of last said Lot 6 and the point of beginning.

Reference is hereby made to the map or diagram of said assessment district, approved by said Board and on file in the office of the County Clerk of said County, which map indicates by a boundary line the extent of the territory to be included in said proposed assessment district, which said map shall govern for all details as to the extent thereof and in the event of a conflict between the said district as herein described and the district as shown on said map, the district as shown on said map shall prevail and shall constitute the correct description of the proposed assessment district.

That, in the judgment of this Board, varying benefits to be derived by different parcels of land lying within said district require, and that, therefore, said assessment district shall be divided into eighteen separate zones, designated Zones A to R, inclusive. Each of said zones, as proposed, is plainly shown upon the said map of the Assessment district on file in the office of the County Clerk, to which said map reference is hereby made for the boundaries of and all details concerning said zones.

The percentage, as proposed, of the sum to be raised each year by the levy and collection of special assessment taxes in said district from the lands in each of said zones for the payments on the principal and interest of the bonds to be issued to defray the expenses of the proposed acquisitions and improvements are hereby determined to be as follows:

Zone "A"	30.632 percent
Zone "B"	1.246 percent
Zone "C"	2.836 percent
Zone "D"	6.419 percent
Zone "E"	12.637 percent
Zone "F"	12.918 percent
Zone "G"	11.233 percent
Zone "H"	0.281 percent
Zone "I"	1.102 percent
Zone "J"	2.490 percent
Zone "K"	0.636 percent
Zone "L"	6.720 percent
Zone "M"	5.913 percent
Zone "N"	2.605 percent
Zone "O"	1.450 percent
Zone "P"	0.104 percent
Zone "Q"	0.389 percent
Zone "R"	0.389 percent
TOTAL	100 percent

It is hereby declared and determined by said Board that all used and dedicated public rights-of-way and streets, as same are shown on the assessment map, including the acquisitions above referred to shall be and the same are hereby omitted from the said assessment district and from the levy and collection of the special assessment taxes thereafter to be levied and collected to cover the expenses of the proposed acquisitions and improvments, and the total expenses of said proposed acquisitions and improvements shall be met by the levying and collecting of such special assessment taxes upon and from the remaining lands within the assessment district, without regard to such omitted lands. It is hereby found and determined by said Board that all of such omitted lands as above described and as shown on said assessment map, are in use in the performance of a public function.

That, to defray the expenses of the proposed acquisitions and improvements as above set forth, bonds will be issued to the total amount of the same, said bonds to bear interest at the rate of seven (7) per cent per annum, payable semi-annually, the first interest payment to be made on the 2nd day of January, or the 2nd day of July (whichever month first succeeds the date of the bonds), next succeeding one year after the date of such bonds, and the aggregate principal of all bonds issued to be paid and discharged within six (6) years after the date of issuance, approximately one fifth (1-5) part of said aggregate principal to be payable annually, all in gold coin, commencing two years after the date thereof, and that a special fund for the payment of said bonds will be constituted by the levy of special assessment taxes upon the lands within the assessment district according to the assessment value of said lands (exclusive of the improvements thereon), and in accordance with the zones and percentages as finally determined by said Board.

The first payment on the aggregate principal of the bonds issued will be made two years after the date of the issuance thereof.

That **Monday, the 19th day of May, 1930,** at the hour of **Eleven O'clock, A. M.,** of said day, is the day and hour, and the chambers of the Board of Supervisors of the County of Contra Costa in the County Court House in the City of Martinez, is the place, hereby fixed by said Board when and where any and all persons having any objections to the proposed acquisitions or improvements, or both, to the proposed grades to which the improvements are to be constructed, to the extent of the assessment district, to the zones into which said district is to be divided, or to the percentages to be raised from each of said zones, or to any or all of the foregoing, may appear before said Board of Supervisors of the County of Contra Costa, and be heard. Attention is hereby directed to the provisions of the "Acquisition and Improvement Act of 1925" as amended to date, relative to objections and protests.

That the proceedings for said acquisition and improvement shall be had and taken under and in accordance with an Act of the Legislature of the State of California known and designated as the "Acquisition and Improvement Act of 1925," approved May 23, 1925, as amended to date, and said bonds shall also be issued in accordance with the provisions of said Act.

Excepting from all the herein described work all of said work that has already been done to the lines and grades as shown on the plans and profiles, and in accordance with said plans and specification.

The attention of all persons is hereby directed to the License Agreement of the Durite Asphalt Company of America, dated January 15, 1930, and on file in the office of the County Clerk of the County of Contra Costa. Said agreement covers the Durite Asphaltic concrete pavement mixtures to be used in the above described improvement.

That Edward A. Hoffman, a competent person, is hereby appointed "Superintendent of Work", without compensation, and he is hereby ordered to cause to be conspicuously posted, in the form and the manner provided in said Act, notice of the adoption of this resolution, which said notice shall consist of printed copies of this Resolution of Intention entitled "Notice of Public Improvement".

That the Clerk of this Board shall ceritfy to the adoption of this resolution and shall cause the same to be published by two insertions in the RICHMOND RECORD HERALD, a daily newspaper of general circulation published and circulated in the County of Contra Costa, State of California, which said newspaper is hereby designated for that purpose and for making this and all other publications in or incident to these proceedings.

I hereby certify that the foregoing Resolution was duly and regularly introduced and adopted by the Board of Supervisors of the County of Contra Costa at a regular meeting thereof, held on the 21st day of April, 1930, by the following vote, to-wit:

Ayes: Supervisors James N. Long, Oscar Olsson, C. H. Hayden, W. J. Buchanan, R. J. Trembath

Noes: None

Absent: None.

J. H. WELLS,
County Clerk and ex-officio Clerk of the Board of Supervisors of the County of Contra Costa.

Publish April 25-26, 1930.

"CHRISTIAN SCIENCE: THE SCIENCE OF PERFECTION"

LARGE AUDIENCE HEARS DR. DE LANGE

At the Lincoln auditorium last evening, a lecture of Christian Science, entitled "Christian Science: The Science of Perfection" was given before a large and appreciative audience by Dr. Hendrik Jan de Lange, C. S. B. of the Hague, Holland, Member of the Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Mass.

The lecturer was introduced by Mrs. Mabel Ayer, who spoke as follows:

Friends:

"For the second time in the history of mankind the heavenly host is singing 'Glory to God in the highest, and on earth peace, good will toward men.'

"As the shepherds went to Bethlehem to see what had 'come to pass,' so you have come tonight to hear the same message as revealed in Christian Science.

"Mary Baker Eddy the Discoverer and Founder of Christian Science, in our textbook "Science and Health with Key to the Scriptures," page 558 has written "This angel or message which comes from God, clothed with a cloud, prefigures divine Science—When understood, it is Truth's prism and praise. When you look it fairly in the face, you can heal by its means, and it has for you a light above the sun, for God 'is the light thereof.'"

"Christian Science came into my experience in answer to a life long desire for a reasonable, satisfying and usable understanding of God and an explanation of the mission of Christ Jesus.

"That desire has been more than fulfilled in Christian Science, reminding me of the scriptural statement "Eye hath not seen, nor ear heard, neither have entered into the heart of man, the things which God hath prepared for them that love Him."

"First Church of Christ, Scientist, Richmond, cordially welcomes you here tonight to listen to a lecture on Christian Science by a member of The Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston, Massacusetts. It gives me great pleasure to introduce to you Dr. Hendrick Jan De Lange, C. S. of The Hague, Holland, who is well qualified both by study and experience to explain Christian Science to you. Dr. De Lange."

Dr. Hendrik Jan de Lange, then spoke as follows:

The stirring admonition uttered by him who is called the Saviour of mankind, "Be ye therefore perfect, even as your Father which is in heaven is perfect," has caused endless speculation and profound perplexity. Yet like other sayings of Jesus, when properly understood, it must have practical value for us in our everyday life. Perfection means the absence of fear and worry and the consequent enjoyment of health and happiness. We may therefore well ask ourselves if these words are not really a clarian call intended to awaken us to practical Christianity The students of Christian Science so regard them; they accept the admonition which the words convey, and endeavor to adjust their thoughts and lives to it.

This command, "Be ye . . . perfect", sounded startling and impossible of fulfillment to a world believing in a God knowing sickness sin, and death and in man as imperfect, sinful, and mortal. Nevertheless,the command was given and was undoubtedly meant to be obeyed. For long centuries, the only way out of this seeming impasse was to interpret Jesus' words in such a manner as to postpone their fulfillment. The earth or place where we are living, was deemed to be unsuitable for attaining perfection. The attainment of perfection was accordingly placed in the future. Perfection was assigned to heaven which in conformity with such theories, was somewhere afar off, where life eternal was going to be enjoyed and happiness experienced. Strangly enough, this heaven requiring eternal life was to be reached only after undergoing death, which is universally admitted to be the culmination of imperfection. All this—notwithstanding the Master's definite words of "Be ye therefore perfect" without any indication of a future time or a different place.

THE BASIC DISCOVERY

An American Christian Science lecturer oncc said, If Napoleon had known enough he would have been driving a motor car and Abraham's wife would have enjoyed a sewing machine. All the materials for these conveniences were available to the world of six thousand years ago just as they are now. Basically it is thought that has changed, not matter. It is to be noted that greater progress in discovery and invention has been made during the last fifty or sixty years than in any other period of human history. This remarkable progress is the result of the ever increasing innate desire for perfection, rarely recognized in ones' self or in others, yet ever urging mandkind consciously or unconsciously to think beyond and above its material surroundings. We affirm that the Science which enables mandkind to do this is really fundamental to all other sciences which brought so many worderful and useful discoveries to the light. It is the Science basic to the teachings and works of Christ Jesus. It wa sdiscovered by Mary Baker Eddy. She called it the Christ Science or Christian Science. It deals with the most important of all problems, namely that of revealing the perfection of God and man and of making applicable to human needs the power and law of perfection. Here the questions naturally arise, "What does this mean?. Admitting your statement, how can we, everyday people, gain the proof that such a power is available to us? The full and satisfactory answer to these questions comes whenever the Principle of Christian Science is understood and vitally accepted and its rule correctly applied.

PRINCIPLE IMPLIES PERFECTION

In the Christian Science textbook, "Science and Health with Key to the Scripturess," written as a result of the revelation of Christian Science, Mrs. Eddy defines the word "God" to mean divine Principle. In this way religion is lifted out of its unstable ground work of sentiment and placed upon the firm foundation of Science. At the same time, true Science is shown to be, not a system of human conjecture ever swinging between the uncertain concepts of the human mind and the inevitable limitations of materiality, but an infinite, inspired, and provable knowledge of God, man, and the universe. The Christian Science textbook further defines God as "incorporeal, divine, supreme, infinite Mind, Spirit, Soul, . . .Life, Truth, Love" (p. 465). How could it be otherwise? These synonyms are in strict accordance with the Bible, where God is called "Spirit," "the Word" or "Logos," the "Father of Lights" with whom is no variableness, neither shadow of turning," and where John's inspired words, "God is love," are to be found. Moreover, these synonyms are in consonance with our highest sense of the great First Cause, with the source of what we know of infinity and eternality with the initial and original Power which made all that was made. How could we be together here; how could we be conscious and speak of perfection, if there were not a divine Principle of perfection, an infinitely perfect, eternal Cause which we, in deepest adoration, call God?

EVIL NOT MADE

Stating that this perfect and infinite Cause made all that was made, someone may remark, "How about all the imperfection, the evil, sin, sickness, death which seem to abound in the world? Has God made these?"

The answer is: How could a perfect Father-Mother God or Principle conceive of, create, and express something so utterly unlike Himself, and still remain perfect, eternal, infinite? Indeed, He could not, and cannot because God made all that was made; nothing less, nothing more This means—and here we have arrived at one of the most glorious revelations of Christian Science—that God did not conceive of nor make nor express the finite, the material, the sick, the sordid. God made everything, and "behold, it was very good," according to the inspired record of the first chapter of Genesis. Consequently, everything that is real exists as an idea of the divine selfhood, God, and is perfect and inevitable as the expression of divine Principle; spiritual and infinite as the expression of Spirit; beautiful and harmonous as the expression of Soul; eternal and existent as the expression of Life; true and unerring as the expresion of Truth; above all, loving and lovely as the expression of Love.

THE RIGHT CONCEPT OF GOD AND MAN APPEARING

The material world with all of its imperfections and limitations is generally believed to be the only real world. It is also generally assumed that God made it and made it material and takes cognizance of it as such. It is to be remarked, however, that even prior to the advent of Christian Science many people were unable to accept the religious creeds which teach that a perfect God creates and knows imperfection, although even such liberal and advanced thinkers continued to believe in the reality of disease, sin, and death. Thus they virtually accepted, together with the believers in religious dogma, a God made after the finite sense of man, or the material concept of man. This God was supposed to be enthroned somewhere above the skies. The pictures of the old masters in Italy and elsewhere illustrate this finte sense of God. To believers of that particular dogma, God is nowadays less definitely located, but is still in more than one respect stamped with the stigma of imperfection. The words in the first chapter of Genesis that God made man in His image and likeness, seemed to the uninspired reader to fortify the belief of such an anthropomorphic God, that is, a God after the human form.

Here comes Christian Science "in the picture," as the current expression has it. It fully accepts the statement in Genesis that man is made after God's image and likeness. However, it makes it evident at the same time that God is the perfect, divine, infinite Creator, or Cause, or Principle. Therefore, man in God's image and likeness must of necessity have no other characteristics than those which belong to Deity. He must be the very expression of these characteristics without measure and without interruption God being the only and divine reality, God's man is the real and only man. This man is spiritual, because God is Spirit; this man is infinite, because God is infinity; this man is eternal, because God is without beginning of years or end of days; this man is ever living, because God is Life; loving, because God is Love; true, because God is Truth; perfect, because God is perfection.

This is a logical conclusion which cannot be gainsaid. A conclusion arrived at not by heeding the material sense testimony, but by following sound reasoning which in the measure of its logic partakes of the divine. The creature we have been supposing to be man, that conglomeration of finiteness, sickness, sin, feebly intermixed with beautiful and noble qualities, is not, then, the man of God's creating. That misconception of man is disappearing in the proportion that it is self-seen as unreal, and in the process, we are gaining a more permanent, perfect, and satisfactory sense of existence.

When this light of understanding downs upon the finite concept, the new birth in Christian Science begins to take place. Thus the "new man," as Paul puts it, is born, "which is renewed in knowledge after the image of him that created him." With this new understanding, the Christian Science understanding, Uesus' words, "Be ye therefore perfect, even as your Father which is in heaven is perfect," receive a new meaning. We see better than before that Jesus did not urge upon us something superhuman or impractical or untimely. We understand that we neither have to change place nor wait for perfection or salvation. We understand that it is a question of change in our consciousness, right here and now; and everybody must admit that it is possible for one to change one's thoughts, if one is shown how to do it.

CHRISTIAN SCIENCE THE HIGHER EDUCATION

It is certainly a remarkable evidence of the insufficiency of the finite conception of education that it is unable to teach consistently the most important subject, that is, how to think. Men are educated in the schools of learning in almost every conceivable subject, save the most essential of all: how to understand man's existence and his relationship to God and the universe. Christian Science fills in this notorious gap. In this way, it is an educational system. Human philosophy speaks of the "higher criticism." Christian Science may be aptly called the "higher education."

This education does not start out from the finite concept. It proceeds from the only source really worth knowing—it proceeds from divine Principle or God. Starting out from the perfect and eternal, we begin to apprehend man's true status as God's image and likeness, as "the compound idea of infinite Spirit; the spiritual image and likeness of God; the full representation of Mind," as Mrs. Eddy has written in the Christian Science textbook (P. 591). "Be ye therefore perfect," as Jesus said, is then understood to mean; Have the understanding of the real status of man as God's image; stick to it under all circumstances; know that it is your divine right of which nobody, no power, no suggestion can possibly divest you; be willing to recognize that the testimony of the material senses is incorrect and that it is undoubtedly so concerning yourself. Accept the comforting thought that God made man perfect and so maintains him forever, and with this thought reject the testimony of the material senses when it is contrary to your health and peace.

When this work is earnestly and consistently undertaken with adequate understanding of God's loving omnipotence and omnipresence, our conditions improve. We become more loving, less selfish, less fearful. Our intelligence is enhanced, our wisdom increased, our forbearance enlarged. We are freed, partly at least, from the burden of believing in the necessity of sin, sickness, and ultimately of death; and that which we call our bodies experience the beneficient influence of this moral regeneration.

EXISTENCE WHOLLY MENTAL

Why are we and our circumstances influenced by our mentality? Because we take cognizance of everything mentally. This is even true of our bodies and of the bodies of others. When we see our hands or feel our feet, we receive a mental impression. It varies with the state of our consciousness. In a state of exhalation we may become altogether unconsicious of a pain which before seemed almost unbearable. Hearing some glad news, our hearts beat more quickly, our faces are flushed by an extra amount of blood supposed to go to our heads. It has been proven more than once, that a thought of fear has caused death. Night dreams show very conclusively that existence is mental. Dreams take us to far countries and we fly in the air on newly acquired wings, notwithstanding our bodies remain motionless in the place where we put them before falling asleep.

When studying Christian Science and gradually increasing in spiritual understanding, we see more clearly the meaning of the statement in the Christian Science textbook that man is "the full representation of Mind." Mind, God, being All, His full representation or manifestation as man stands for the exemplification of this Allness. Man's real being, then, transcends in every respect the human body. The popular saying: As a man thinketh in his heart, so is he, has been interpreted in Science and Health, "as a man spiritually understandeth, so is he in truth" (p. 213). Understanding that man is "the full representation of Mind," awakens us gradually to the recognition and attainment of that dominion over all the earth which is promised to man in the first chapter of Genesis.

THOUGHT ANALYZED

To those who have not yet experienced the results of Christian Science education or practice, it may seem strange that a change of mentality should be able to accomplish so much as has been asserted here. Christian Science not only furnishes the explanation; it does more. It actually enables us to show conclusively the value of improved mentality. Thoughts are not only characteristic of their source, but when they are spiritual and therefore representative of God, they partake of and show forth the very power and presence of that source. They are divine ideas because their source is God. When we accept them and entertain them, they enable us to be the beneficiaries of the presence of God, Life, Truth, Love, harmony, perfection, as the only presence. This realization has healing power because it partakes of the presence, power, law, and activity of perfection, divine Love.

LIVING THE CHRISTLINESS OF JESUS

Jesus of Nazareth was the God-like exponent of these truths. They were the very essence of his life and works. His spiritual understanding of God and man was such that he comes nearest to the mark of perfection.

Christian Scienticts love Jesus more sincerely and practically than they formerly were able to do. Why? Because Christian Science makes more clear than do other teachings the nature of Jesus' life and works. A Christian Scientist's works of healing and saving are the proof of his religious profession. Thus the assertion that Christian Scientists understand Jesus better than others is not without justification. They do, to a certain extent, the same works that he did. They heal the sick pronounced by a finite concept of medicative science to be uncurable. They save the sinners with a fuller, more loving understanding of perfection or salvation, whereby the salvation becomes effective now, being based upon the actual destruction of sin.

Jesus' example stands unparalleled. He was endowed with the understanding of the healing power of Truth without measure. For this reason he bore the unique title, Christ. Happily this Christ-understanding is not confined to Jesus himself, for that would be contrary to God's law, the law of universal Love. Every one of us may gain the Christ, Truth, in some measure to-day and in greater measure day by day, impelling us to develop the full status of perfect manhood. Mrs. Eddy writes in the textbook of Christian Science that Christ is "the divine manifestation of God, which comes to the flesh to destroy incarnate error" (p. 583). Christ, Truth, is here and now, to save us from the despair and misery of the imperfect, finite, sinning concept of ourselves and others, and to endow us with the understanding of that which we really are, of our real, perfect selfhood, The Christ is not dependent upon time or place, the Christ is not partial, has no predilections. Christ is the ever-active and ever-present, unfailing power of God. Nineteen hundred years ago, Christ inspired Jesus to exhort mankind to be as perfect as the Father in heaven. At this moment, Christ exhorts us to the same perfection. We may all have thoughts, this very moment, which are Christ-like in nature and power. These thoughts do actually reveal our perfect selfhood.

CHRIST THE COMFORTER AND REDEEMER

Not the person of Jesus, but the Christ, his divine selfhood, was and is the healer of the sick and the sinning. Our Master acknowledged this clearly when he said, "I am the way, the truth, and the life." "I and my Father are one," "My Father is greater than I." Throughout his whole career Jesus' aim was to help his disciples and those who came to be enlightened, to understand this Christ-nature.

In the fourteenth chapter of the Gospel according to John, the Master is seen to be particularly desirous to impart that Christ-understanding to his disciples. Jesus told his friends not to be troubled about his approaching departure, but to believe in the Christ, that is, God manifested, because they believed in God. In such knowledge was salvation for all those who acquired some understanding of the Christ. In the wideness of his vision he stated that they who believed in him, that is, understood his Christ selfhood, would do the works that he did. Thus the disciples and all of us who are pondering the sacred books of the Bible, are led to the wholly impersonal impartation of God to mankind. Jesus called it the Comforter, the Spirit of Truth. Mary Baker Eddy called it the Christ Science or Christian Science.

THE UNFOLDING OF THE CHRIST IDEA

Christian Science comes to us as the cumulative development of the spiritual idea, or Christ-idea, throughout the ages. In the history of mankind one can trace that God-given desire for perfection on the part of humanity. It shows itself in the natural desire for liberation from all bondage and mere finite ambition. The Bible exemplifies it. In the Old Testament, we read of the prophets; and they had a clearer understanding of God's power available for mankind. They were thus enabled not only to foretell the advent of the Redeemer, but also to do works of healing which to the finite concept were miraculous.

Jesus of Nazareth—as has been narrated in the New Testament—showed that a greater amount of perfection was within the reach of mankind than any inspired person before him had demonstrated. During three hundred years after his three year's ministry on earth, the spiritual import of his teachings was understood, and his disciples and others actually proved it by healing the sick through their Christ-understanding.

Later on, however, the discernment of spirituality was lost to such a measure that Christianity considered the works of the prophets and the Master to have taken place as a special dispensation of God and in a period definitely closed. The saving of sinners remained the province of the clergy. The healing ministry, so conspicuous in the teachings of Jesus, was relegated to materia medica, to matter instead of to the one Mind, God.

In the Middle Ages, Christianity seemed almost to be lost. However, that could not be. The Reformation taught humanity again the possibility of a direct communion with God, not monopolized by a priesthood. It also gave the layman the opportunity to read the Bible in its fullness. Individual investigation and judgment were in this way encouraged and established. The Scriptures were searched freely and mankind's sense of individual and collective liberty was thereby developed. This unfolding of the Christ-idea took place especially in the northwestern part of Europe. Wycliffe, Luther, Calvin were shining exponents and leaders of this movement for spiritual freedom. Wherever priest or worldly soverign strove to crush out these God-bestowed and inalienable rights of man, undaunted individuals were found ready to leave their cherished homesteads and look for other dwelling places where they could enjoy freedom of conscience and the pursuit of happiness in the way this was inspirationally revealed to them.

In the beginning of the seventeenth century, a small body of such liberty-loving people, later on called the Pilgrim Fathers—and let us not forget that there were also the Pilgrim Mothers!—left the shores of England. After being lovingly sheltered for a while in Holland, where their memory is highly cherished until the present day, they crossed the Atlantic to settle on the North American Continent. In later years, the United States of America became a nation destined for a growth and prosperity unequaled in human history. Why? Because the framers of the American commonwealth kept aloft the banner of liberty and equality. It need not be wondered at that in this community of religious and political freedom the Science of Christianity was discovered and the Christian Science movement founded. The progressive unfolding of the Christ-idea found here a better prepared soil that made possible the great event.

THE DISCOYERER, HER HEALING AND WORKS

Here, in what was called the new world, a pure and loving woman, Mary Baker Eddy, discovered, in 1866, the Science of Christianity. At a time when the physicians had given up all hope for her recovery from the effects of a serious accident, she turned to her Bible after all material means had failed, and read in the Gospel of Matthew the account of the healing of the man sick of the palsy (Matt. 9:2-7). A new light upon the Scriptures flooded her thought. She was instanteously healed from the condition considered fatal, much to the astonishment of her friends and the doctors.

A description of this greatest of all discoveries, and of the events leading up to it, may be found in her book, "Retrospection and Introspection."

Mary Baker Eddy's love for humanity gave her the desire to impart to others this revelation of God's perfection and of His perfect man. For three years, she withdrew from society and studied the Bible. She tells in her writings how this led her into a new realm wherein it became evident that the divine Mind alone must answer the questions about existence, and that one must acquaint himself with God in order to be at peace.

The revelation of Christian Science has been fully set forth by Mrs. Eddy in the Christian Science textbook. Here the author explains that the healings recorded in the Bible were not supernatural, but supremely natural, being in accord with the divine law; the law which frees mankind from imperfection and finiteness. This law transcends and overcomes the finite concept of law, the latter being limited and afflictive. The divine law is utilized by the right understanding of God. This understanding reveals God's law as available at all times and under all circumstances.

The divine nature of Mrs. Eddy's revelation has been abundantly proved. Innumerable instances of healing, by herself and by other Christian Scientists, haveof established the availableness of divine power. No disease, however incurable according to medical doctrine, has been left out from the glorious records of healing which Christian Science has produced.

PERMANENCY OF THE CHRISTIAN SCIENCE MOVEMENT

Mrs. Eddy is not only the Discoverer of Christian Science, but also the Founder of the Christian Science movement. Feeling that the Science which reveals perfection must be perpetuated, independent of her presence, she founded The Mother Church, The First Church of Christ, Scientist, in Boston, Massachusetts, and made it possible for branch churches to be formed wherever Christian Scientists complied with certain requirements. The Church Manual, which Mrs. Eddy gave as the magna charta for the movement, furnishes the rules and regulations of The Mother Church and the branch churches. The latter are strictly democratic in their organization. In this way the permanency of the Christian Science movement is wisely safeguarded.

As a further proof that Mrs. Eddy intended the Christian Science movement to be perpetuated among mankind, it may be mentioned that she ordained in the Christian Science churches preachers which would last as long as the world might be inhabited by mankind. These preachers are the Bible and the Christian Science textbook.

THE BIBLE FUNDAMENTAL

In the Christian Science Sunday and Wednesday services, a larger part of the time is devoted to the reading of suitable Bible texts than in services of any other Christian denomination. In this respect, if in any, Christian Scientists may surely not be called unchristian by those who attempt to criticize them. On the contrary—as has been stated—Mrs. Eddy received the inspiration for her discovery from the Bible. The Christian Science textbook is built upon the Bible. Moreover, many people who before coming into contact with Christian Science were not able to understand the Bible have found that the Book of books has been opened and become comprehensible to them.

Let me say here that I myself did not understand the Bible before Christian Science found me. At the request of my parents I received Bible lessons from a Protestant clergyman whom I still honor for his loving devotion; but it was impossible for me to accept God and the Bible narratives as they were presented to me then. I could not even believe that my friend the pastor himself believed what he told me. How much all this has been changed since advancing somewhat in the knowledge of Christian Science! Why! ? Because the Christian Science textbook has verified its name by actually being for me the "Key to the Scripture's" guiding me to discriminate between the inspired Word of God and that which is not. This is in consonance with one of the religous tenets of Christian Science, declaring that "as adherents of Truth, we take the inspired Word of the Bible as our sufficient guide to eternal Life" (Science and Health, p. 497). This makes all the difference. Having understood as a result of the study of Christian Science that God is Love, Life, Truth, Mind, perfection, neither knowing nor admitting sin, sickness, and death, we accept as inspired those Bible passages which are in accord with fundamental Truth and logic.

One must not be inclined to suppose that by using our spiritual understanding the Bible becomes disconnected and fragmentary. On the contrary, its beauty and consistency grow in the proportion that we are endowed with spirituality. Verses which formerly seemed obscure, receive a new light and a new meaning.

This new meaning is not merely something of theoretical value and literary enjoyment; it is of immediate helpfulness in our daily lives. In the light of Christian Science, the Bible is no longer an historic narrative interspersed with records beyond imitation and emulation because of being thought miraculous. God's hand is not shortened. As a result of the spiritual understanding which Christian Science gives, the Bible receives fresh significance. We experience that in the measure of our spirituality the wonderful works of the Master and his disciples are imitable here and now. The Christian Science practitioner feels by reading the Bible an impelling inspiration to go and do likewise.

THE CHRISTIAN SCIENCE TEXTBOOK DIVINELY INSPIRED

It is the faithful, intelligent, and consistent study of the Christian Science textbook and Mrs. Eddy's other writings that brings to us this wonderful illumination of the Scriptures. "Science and Health with Key to the Scriptures" is seen by its author as a divine revelation. She states in "The First Church of Christ, Scientist, and Miscellany" (p. 115): "I should blush to write of 'Science and Health with Key to the Scriptures' as I have, were it of human origin, and were I, apart from God, its author. But, as I was only a scribe echoing the harmonies of heaven in divine metaphygsics, I cannot be supermodest in my estimate of the Christian Science textbook." Indeed, the work which reveals the allness of an infinitely and eternally perfect God, and the means by which to bring out the proof of this divine perfection in human existence, here and now, unconditionally and without delay, must partake of the divine and must be divinely authorized because divinely conceived.

DEMONSTRATION AND FRUITION

For you and me, my friends, the most important part of the Christian Science enlightenment we are now undergoing is the fruition just alluded to. How may we experience the blessings which Christian Science promises, in ourselves, in our family, in our business, in the relations between our country and other countries, in the intercourse between our race and other races?

Let me say that only he who actually demonstrates Christian Science will understand it. Demonstration is the proof of understanding, Wherever the letter is adhered to, but the demonstration not made, the understanding has to be increased by patient study and faithful utilization of that which is learned. So it may be seen that demonstrations naturally follow all along the line of a more correct understanding of Christ, Truth; and we find that there need not be any postponement of demonstration. A mighty factor in this work is the truth taught in Christian Science that God does not impose punishment; a God who is wholly good and perfect cannot bestow or admit anything imperfect or afflictive. God is indeed Love, and has nothing in store for mankind but untold blessings. In God there is no condemnation of man. Never! We can only condemn error. A person acting erroneously is a victim of error. He needs help, not condemnation. We are helping him by knowing the perfection of his real being and the inanity of the error. In this way are brought out the divine law and order which only have blessings, not curses. From the moment one has the slightest understanding of Christian Science, these blessings appear in his life, while the curses are gradually eliminated. Understanding and fruition go hand in hand, they are indissolubly connected as cause and effect.

THE PRAYER OF UNDERSTANDING

Prayer is the means whereby we become conscious of the blessings God has already bestowed upon His man. Christian Science has revolutionized the customary prayer that asks God to do something or not to do it. The chapter entitled "Prayer" in the Christian Science textbook explains this. Asking God to do something specific for us implies that God either does not know what we really need, or is not willing to grant it to us. In "Prayer" we read (p. 2): "God is Love. Can we ask Him to be more? God is intelligence. Can we inform the infinite Mind of anything He does not already comprehend? Do we expect to change perfection? Shall we plead for more at the open fount, which is pouring forth more than we accept?"

The irrefutable conclusion arrived at is that we must not ask God to do or not to do something, but that we known and realize what God is, and what man as His perfect expression has already received. In our prayer God must not become human to us, but thought must become Godlike. By this realization thought ascends to the throne of grace and must stay there. This takes place in the proportion that we have the desire for growth in grace. We must assimilate more of the divine, by forsaking sin and all material, finite, inperfect, degrading beliefs.

The Christian Science treatment whereby sinners are saved and the sick are healed, is nothing else than such a scientific prayer. It is the affirmation of the divine perfection as the Principle, law, and power of the treatment and the denial of all appearances, suggestions, and beliefs to the contrary. The realization of the perfection of God and man confirms the truth of being, and brings it out in our daily experience. The more continuous and uninterrupted such realization is, the more potently it operates; hence Paul's admonition, "Pray without ceasing."

The healing power thus made operative is not restricted. It not only exactly meets the specific need, but it also helps to lift the burden of limitation and imperfection weighing down humanity at large. Every realization of good with the understanding of its divine origin, power, and law; every denial of error with the authority of divine Principle precipitates the destruction of disease and other evils. This is done so much the more effectively and successfully in the measure that the one who prays or gives the treatment makes his declaration of perfection from the standpoint of Truth infinite and all-embracing, and his denial of error more impersonal and of a wider range. Such realization approximates the divine Mind and establishes Mind's immanency as mankind's experience.

Those people who are desirous of being helped by Christian Science treatment and in recognition of it are willing to pay some equivalent for this work, are more readily healed than others who are either ignorant about it or have not yet discerned its value. The Christian Science practice of healing is supported by this fact. Christian Science practitioners, duly authorized and qualified for this sacred office, are to be found in nearly all large cities and in many small cities of the civilized world.

REGENERATION ESSENTIAL FOR HEALING

Healing the sick is a very important section of the Christian Science ministration, but it is not the ultimate of Christian Science. The cure of bodily disorders is a means to something higher than bodily health and comfort. It is perfectly legitimate to use Christian Science for the healing of a physical complaint, but the practitioner's task is not completed when it stops there.

This reminds me of what I once heard in a testimonial meeting in a New York Christian Science church. A lady spoke of her gratitude for a healing received in Christian Science. She used to belong to the Hebrew faith, but had become a member of a Christian Science church. One of her nearest relatives had asked her, "You have got the healing now; why don't you come back to us?" She had not followed this summons, and thereby proved that her physical healing ih Cnristian Science was but a stepping-stone to a higher regeneration.

A more loving attitude in life, a nobler outlook upon it, greater spiritual-mindedness, purity, gentleness, in one word, moral regeneration, is the main purpose of Christian Science. When the morale improves, better conditions of health and life in general will surely supervene.

INDIVIDUAL SALVATION ULTIMATES IN WORLD SALVATION

In this way Christian Science saves the individual and will ultimately be recognized as the only essential means for world salvation. Many movements for world salvation have been started without attaining their aim. Why? Because such movements always aimed to reform "the other fellow." Christian Science is not trapped in this fallacy. It teaches us to begin by reforming ourselves, to go on by reforming ourselves, and to end by reforming ourselves. The good example is the mightiest incentive. When we overcome a false concept, be it in the form of a disease, or an enemy, or a world sorely distressed by the fears of lack of space, lack of goods, lack of markets, in every case some relief is experienced. In the case of the individual it will be more readily traced than in the case of the world, but it is nevertheless true in both cases. Since the world is made up of individuals, the salvation of the individual will greatly stimulate world salvation. If everybody begins with and keeps at self-reformation, he will help the world in the most effectual way. General fear, under which the world is so much suffering and which is the source of many evils is a composite of the sum total of personal fear. Fear obliterated in individual thought will obliterate war between nations and races, and conflicts between classes.

GOOD INFINITELY AVAILABLE

There is plenty and more than plenty of the things which make existence desirable and enjoyable for every individual, for every nation, for every race, if these things are but conceived of spiritually enough. There is never a scarcity of mathematical numbers; there are enough two's and three's for everybody, and still there is but one number two and one number three. One never heard of a war being waged in order to conquer, say, a hundred thousand lives belonging to more fortunate nation. Why? Because we have already such an enlarged understanding of mathematics and its figures, that everyone has at his disposal as much as he knows of it. And we know enough of it in the civilized world to know that there is enough for all, and that warring about mathematics never would increase its figures. That is the reason why we do not war about them, and never will. The same is true of air, sunlight, and in more restricted sense of water and other commodities. It is equally true for things which are still the objects of war and competition, although it is not yet understood sufficiently. Christian Science is giving that necesary understanding which is spiritual, and cannot be acquired in any other way. It teaches that all good is infinite, universal, eternal, instantly available for those who know enough to avail themselves of it.

Jesus has set the example in this respect as he did in all respects. At the shore of the Galilean sea, he fed the five thousand with a few loaves and fishes. How could he do it? By knowing that man as God's image and likeness lives by the Word, by the spiritual understanding of God, as a result of man's inherent oneness with God.

This instance of the infinite availability of good took place in accordance with divine law rightly understood and utilized. It is not an isolated instance. Spiritual satisfaction can be attained and maintained by every individual, consequently by every nation, by every race. "Be ye . . . percet" means satisfaction to everyone in this audience and in the world at large. It means satisfaction in every detail of existence through the understanding and demonstration of the practical spiritual truth taught in the Science of perfection, Christian Science.

LOCAL Y TRACK MEN TO MEET MAY 10

The track athletes of the Richmond Y. M. C. A. will compete May 10 at a local track meet to decide who shall represent Richmond in the state Y. M. C. A. Californiad track meet at Berkeley May 17

Attempts are being made to secure the Richmond Union high school track as the scene for the local meet.

Competition will be held in the 80 pounds, 90 pound, 100 pound, 110 pound, 120 pound, 130 pound, unlimited boys and Y. M. D. divisions.

In the two lightest divisions the boys will compete in the 50 meter dash, 75 meter dash, high jump, running broad jump, and four man relay.

In the 100 and 110 pound section there will be the 50 meter dash, 100 meter dash, high and broad jumps, and four man relay.

The 120 pounders will take part in the 100 meter dash, 200 meter dash, 400 meter run, broad and high jumps, hop, step and jump, 12 ound shot, and four man relay.

There will be the discus and javelin throws in the 130 ound division in addition to the events of the 120 pound division. The same events will be held by the un'imited boys. The Y. M. D. boys will also compete in the same events, plus the 1500 meter run and the 16-pound shot.

Longfellow Net Team Victorious Over Garfield

The tennis team of Longfellow Junior high school gained its fourth victory of the season yesterday by defeating the Garfield Junior high school net squad 3 to 2 on the local city hall courts. The Longfellow boys have yet to lose their first game of the year.

In yesterday's single competition, Garibotti of Lougfellow defeated String of Garfield 6-1, 6-1, while Smith of Longfellow conquered Street 6-3, 2-6, and 6-0. Pickering of Longfellow took Jones of Garfield into camp with a score of 6-0, 6-1. Butler of Longfellow lost to Davenport of Garfield, 6-2, 6-0.

In the doubles, Hainrich, and Knight of Garfield, defeated Grignashi and Garouttte of Longfellow, 6-3, 6-3.

The Poets still have a heavy season ahead of them. They will meet the Hrbert Hoover team of Albany soon, while two more matches with Edison and one more with Roosevelt are expected to be scheduled by O. Pickering.

The Longfellow tennis outfit has already defeated the Roosevelt Junior high school aggregation in two tournaments. The Longfellow has also been twice victorious over Garfield Junior high school of Berkeley.

The Longfellow team is being coached by Herbert Hunn of the school faculty. Clarence Garibotti is captain of the squad.

Carnera To Be Banned In N. Y.

NEW YORK, April 25.—(UP)—Primo Carnera, Giant Italian battler, will be suspended in New York state, Commissioner James A. Farley, chairman of the New York State Athletic Commission, announced today.

The action will be in accordance with a ruling of the California commission, which revoked Carnera's license for an allegedly "fixed" bout at Oakland.

The commission has studied informally the transcript of the testimony at the California hearing.

Asked what action was expected to be taken, Farley replied:

"Oh, we'll throw him out. We'll do it at our next meeting, April 30."

OAKLAND SINKS TO SECOND BY DEFEAT

SAN FRANCISCO, April 25.—UP—Sacramento went into first place of the Pacific Coast league today by beating Los Angeles, 8 to 4, while the San Francisco Seals were trimming Oak'and, which had held the leadership three days, 11 to 8.

Six runs by the Senators in the sixth inning gave them their fourth straight victory over Los Angeles, and the Angels had dropped from first to fourth place by dropping the four games.

Oakland held an advantage over the Seals until the last of the third inning, when, with four singles and an error, the Seals scored four times. The winning run came in the last of the eight when Vergez of Oak'and droped a pop fly and two San Francisco players crossed home plate.

Seattle won the series with Hollywood by beating the Sheiks, 5 to 2, and Portland turned on the San Francisco Missions, administering a 17 to 1 trouncing.

Baseball Game With Alameda Team Delayed

The baseball contest scheduled to be p'ayed yesterday between Richmond and Alameda high schools was postponed until Monday.

The cause of the postponement was the sudden illness of the Alameda high school coach. The Alamedans offered to forfeit the game, but the local ath'etes offered to play the game Monday at Alameda high school.

There is only one more contest to be played by the Richmond boys after Monday's game. The final game of the season will be fought against Emeryville high school at Emeryvi'le.

Joe Viano will direct the activities of the local varsity for the remainder of the season due to the recent resignation of Head Coach Ivan W. Hill from the position of baseball coach in order to devote more time to football.

The Alamedans are leading the Alameda County Athletic league at present, and a stiff battle is therefore in store for the Richmond Union high school diamond cavorters. However, the Richmondites have already once defeated the Island city boys, and the locals are fairly sure that they will be able to once more repulse the Alamedans.

Harold Swenson Awarded Big C

The big "C," emplematic of superiority in sports at the University of California, has been awarded Harold Swenson of Pinole. The local athlete played at second base for the U. C. Varsity baseball team. The executive committee of the Associated Students of the university, made 49 athletic awards this term.

Police Scatter Mob Of Hindus

CALCUTTA, India, April 25.—UP—Buckshot was used by police today to scatter a mob of rioting Indians at Neela, between Calcutta and the sea.

The crowd, numbering 4000, used stones and large sticks to attack the police who attempted to prevent the illicit manufacture of salt. Some of the rioters surrounded a group of police, cutting off their retreat. Two rounds of buckshot fired at their feet scattered them without wounding any.

The disturbance was the most serious reported today in the Bengal district, which with the Punjab, the Bombay presidency and Mysoi have been the chief trouble centers in Mahatma Gandhi's independence campaign.

Eastern frontier rifles sent from here last Saturday to pursue insurgent raiders near Chittagong returned to that city after killing a number of rebels in the hills.

Spring Grid Practice At High School

The pigskin once more looms large on the skyline at Richmond Union high school. The mud of last season's battles is being scraped from footgear and uniforms, and the local high school athletes are loosening up their stiffened joints in preparation for the high school football season of 1930.

Spring grid practice started at Richmond union high school yesterday afternoon with a turnout of almost 30 boys. The majority of the football competitors only signed up last night. They will really start to work next Wednesday under the direction of Coach Ivan W. Hill, who will be assisted by Russell Lane, Charley Jackson and Roy Carson, all former stars of the local varsity grid outfit.

Hill will generally supervise the training and work-outs, and Lane will assist in coaching the backfield, while Jackson and Carson will tutor the linemen in the art of football.

Several veterans of last season signed up for the coming practice last night, and there was a generous number of inexperienced youngsters who promise to make good football men with a little more experience under action.

Among the veterans who signed up yesterday were Mike Brock, Ed Masek, Ed Westman, Albert Brignone, Benny Hoefter, Raymond Juillerat, Ugo Boschetti, Bill Young, Carl Drexel, Woodrow Snodgrass, George Miller, Herbert Heise and Jack Stoddard. The newer athletes who stated their their desire for action yesterday were Tom Wilson, Frank Avila, Piagella Avila, Lawrence Golden, John Gerletti, Louis Ferry, Lino Corazzo, Ken Mitchell, Renaldo Beltz, Frank D'Avilla, Jerry Burke, Leonard Coombs, Fred Villalovos, Charles McCausland, and Frank McMullen.

When the present baseball season comes to an end Tuesday, a number of Richmond union high school's gridiron stars will be released for spring practice. Among these boys who are still on the diamond are John Rosano, Leslie Scarcella and Louis Ball.

Several Richmond veterans such as "Rusty" Lane, Charley Jackson, Art Neckel, George Degnan, Walter Freeman, Louis Accomazzo, Howard Dalton and R. Barton will be absent from this year's squad.

Richmond high school's varsity football squad met with rather heavy disappointments last year. They did not win a majority of their games. However, many of last year's inexperienced players will this year have a little more confidence, which semed to be the main thing lacking in the makeup of the Richmond team. In several victorious games of last season, the local boys showed a sensational attack. If they can mend the rough spots in their defense this year, the Richmond Union high school athletes should be able to handle the teams of the Alameda County Athletic League this season.

Special effort will be put forth by the coaches this year, as this season will see their entrance in Alameda County Athletic League football competition.

New Strife In Samoa Looms

APIA, British Samoa, April 25.—UP—Strife between New Zealand government officials and the natives of British Samoa assumed a new phase today with the energies of the government directed toward suppression of the women's movement in symphony with the Nationalistic organization.

New Zealand governs British Samoa under a mandate from the League of Nations.

The situation was sharply outlined when a court fined five pounds each Mrs. Rosabel Nelson and Mrs. Priscilla Munch, who were educated in the United States, for taking part in a parade of Samoan women wearing the Mau colors, emblematic of the Nationalistic movement.

The two women are sisters, partly of Samoan blood. They are the daughters of the late H. J. Moore, an American trader who was frequently mentioned by Robert Louis Stevenson in his writings.

WANT ADS GET RESULTS IN THE RECORD-HERALD

WASHINGTON IN 6-4 WIN OVER ATHLETICS

By UNITED PRESS

American League:

Goose Goslin's eighth inning home run with a mate on base and Lloyd Brown's effective pitching enabled the Washington Senators to move into the American league leadership Friday with a 6 to 4 win over the Philadelphia Athletics. The victory was the third consecutive win of the season for Brown.

Walter Stewart, St. Louis Browns' southpaw also turned in his third straight win, ho'ding the Chicago White Sox to 6 hits and winning 4 to 2. It was the Brown's fourth straight victory, advancing them to third place.

Cleveland came from behind to defeat Detroit, 5 to 4, in ten innings, scoring the winning run on a force play with the bases filled.

Doubles by Lazzeri and Chapman in the tenth inning broke the New York Yankees' five game losing streak and Bob Shawkey's team annexed its first victory of the season, defeating the Boston Red Sox, 3 to 2. Babe Ruth hit home run No. 1.

National League:

The Chicago Cubs won the National league's first extra inning game of the season, defeating Cincinnati, 6 to 5, in 12 innings. Cuyler's triple and sing'es by Wilson, Heathcote and Grimm won the contest.

Dazzy Vance pitched a three hit game, Brooklyn defeating the Boston Braves, 5 to 1.

George Fisher, National league batting leader, went hitless and the St. Louis Cardinals were defeated by the Pittsburgh Pirates, 6 to 1. Chick Hafey of the Cards and Flagstead of the Pirates hit home runs.

The New York Giants were idle for the fourth straight day when their game at Philadelphia was postponed because of cold weather.

COREY NINE TO MEET Y.M.I.

The Corey Garage nine will cross bats with the strong Richmond Y. M. I. team Sunday afternoon at 2 o'clock at the El Cerrito baseball diamond.

That is, of course, if the rain stops raining and the sun starts doing its work.

New blood has been injected into the Corey nine with the addition of Roy Brendell, who will play left field for the men.

The remainder of the lineup for the Coreys will include Chamber at centerfield; Klatt at right; Muyle at third; Matteri, short; Prolo, second; Baldwin first base; H. Brendell, pitcher and San Miguel, catcher.

The battery for the Y. M. I. team will probably be Viano and Morrison.

Californiad Finals Will Be Held Today

Richmond Y. M. C. A. athletes who placed in the semi-finals of the state Y. M. C. A. Californiad last week-end will compete in the Californiad finals with the San Francisco Y. M. C. A. today.

Tennis finals will be held at the Berkeley Tennis courts at 1:30 this afternoon. Richmond will compete in two doubles sets. The local teams will consist of Newman and Faust, and Carlin and Hurley.

Bill McCoy will participate in diving competition in the Navy Y. M. C. A. swimming pool in San Francisco at 7:30 o'clock.

In ping pong competition, Darrow Sutton of Richmond will compete with a San Franiscо ping pong athlete at the Oakland Y. M. C. A. at 7:30 p. m.

School nurse says all girls should know this

TALKING to a roomful of high school girls on personal hygiene, an experienced district nurse said: "One of the basic rules of health for girls is to keep the system functioning naturally at all times. Normal exercise and diet habits should be encouraged. But when necessary there's no harm in taking nujol, since it works mechanically and can't disturb the normal functions of any organ of the body. Particularly with girls, there are times when nujol should always be taken. Take a spoonful every night for a few days. It's a thoroughly safe and harmless method. It won't cause distress or gas pains or griping."
Nujol is different from any other substance. It contains no drugs or medicine. It can be taken safely no matter how you are feeling because it is so pure and harmless, and works so easily. Every woman should keep a bottle on hand. Every druggist has this remarkable substance. Get the genuine.

'ISLE OF ESCAPE'

Copyright 1930, Warner Bros. Pictures Inc.

Based on the Warner Bros. motion picture and the novel by Jack McLaren of the same title.

SYNOPSIS

On the South Sea island whither they have fled to escape her brutal husband in name only, Stella Blackney and David Wade are happy until Moira, a half-caste girl they befriend, falls in love with David. They quarrel and Stella is carried out to sea in an oarless boat. David learns that he loves Stella more than anything else and sets out in a cutter to find her. He encounters her husband, O'Shane, come to reclaim her and for vengeance. When O'Shane learns that the deserted canoe he had passed had carried Stella away, and they realize she has been captured by head-hunters from a nearby island, the men forget their quarrel and set out in search of her.

CHAPTER XV—Continued

At mid-afternoon they were under the lie of the mountains and sailing along them.

For an hour they sailed that deep-shored coast, winding through and between reefs and sandbanks, and other shallows; then — almost abreast of O'Shane's vessel, for the wind had strengthened—they came to a long, high headland which jutted abruptly seaward, and rounding it, entered a deep, wide bay.

CHAPTER XVI

Wade's and O'Shane's small boats reached the shore together. With O'Shane were a number of his crew, fuzzy-headed New Guinea men, each with a rifle, and some with revolvers besides; but Wade had with him only Dolobe, for to have ordered the Motogaru men to accompany him would have meant at best an acquiesence sulky and fearful,

"Come on, produce her!"

and therefore entirely useless; indeed, men in the condition of mind that was theirs would have been a definite hindrance.

"Cunning devils!" commented O'Shane as they went up the beach.

The most outstanding feature was the behaviour of the villagers. It was a most peculiar behaviour in the circumstances. From the moment of landing, and before it, the two white men and their natives had been expectant of attack, of some display of resistance in keeping with the character and savage reputation of these people. They kept their rifles "at the ready," and their manner of going up through the palms was the manner of a scouting party making a cautious approach. But no attack came.

"Not a bit afraid of us, are y', y' devils! We'll see all about that!" O'Shane strode up to one of the villagers and grasped him by the shoulder. "Where's the chief of yours? Kapa?"

The villager indicated with his hand a man who had come out on to the platform before the door of the Sacred House.

"Kapa," muttered the villager.

Kapa was young, powerful of build, dead black of skin, and naked save for a loin clout of printed calico.

At the approach of the white men Kapa took from behind his ear a cigarette made from crude tobacco rolled in a strip of rolled banana leaf; and put it in his mouth.

"You want something?" he asked easily, and the accent of his English was as good as his phrasing.

"Got a match?"

To Wade he was a remarkable phenomenon. He was a kind of white black-man, or a kind of black white-man, a mixture of the unmixable, a paradox. But Wade didn't dwell on this. With revolver raised and aimed, he stepped to the foot of the platform.

"Where is she?" he said evenly.

"The white woman y' kidnapped! My wife!" shouted O'Shane. "Out with her, or something's goin' to happen dead sudden!"

A flicker showed in Kapa's eyes; curiously sophisticated eyes they were, out of character with the rest of his face.

"You have come very quick," he said. "You must have hurried."

O'Shane raised his rifle.

"Come on! Produce her!" he roared; and all the threat that was the note of his being was in his tone.

Kapa showed no concern whatever. Just as the villagers about the houses were nonchalant, so was he nonchalant.

"And if I don't?" he asked.

Then he smiled.

"I don't reckon you'll shoot," he added.

"And why not?" from Wade.

Kapa lit his cigarette from a lighted stick brought him by one of his men. The man walked respectfully backwards from his presence.

"Because," said Kapa slowly, "it will be the end of the white woman. That's something you want to get well fixed in your minds.

"It's this way" he went on. "When I saw your boats comin' I guessed what you were after. It wasn't hard to guess—though I must say you've been damn quick. So, I fixed things. I ain't takin' chances. I fixed things. I'm the boss of this village, and of my other village up there in the mountains. The real, king-pin boss. What I say goes, and goes quick."

He took a deep puff at the cigarette, and blew out the smoke as though in expression of a most profound satisfaction.

"I've fixed it that if you don't drop that pistol right now the woman dies. Try anything on me, and it's the end of her. She don't mean anything much to me—as a woman. I'm only keeping her because she's white."

There was no mistaking that he meant it.

"You swine!" O'Shane breathed.

And at the word Kapa threw away his cigarette. A sudden flaring came into his eyes.

"Swine!" he repeated. "That's what they called me in the sugar-fields of Queensland. I was a swine—that's all In me is the blood of great men! In Me—Kapa!" He stepped forward a little, with his head thrust forward and his hands clenched as though to strike.

"I, Kapa, was taken to work on the sugar-fields. Stolen! Kidnapped! Blackbirding, they called it. I was only a boy. Ten years old. That's all. They came in a schooner, those blackbirders, anchored where your boats are anchored now, and asked the people to go off and receive presents from the store-chest. The people were simple. They knew nothing of white men, and white men's ways. They were—what is the word?—trusting. Yes, trusting. Forty of us went on board. The white men took us down into the hold and showed us the store-chest. There were all kinds of things—rolls of cloth, beads, hand-mirrors—and they told us to choose what we would like. They said they wanted to show us how much they liked us. They said they were our great friends. The lying devils! While we were down there choosing they ran the hatches on and put to sea . . . It was the last I was to see of my home for eighteen years . . ."

"Eighteen years of slaving for white men!" Kapa continued. "Eighteen years of being a work-beast! Back there I was a bit of dirt!" He waved a hand in the direction of Queensland. Queensland was a thousand miles away, but the manner of his waving seemed to bring it within sight. "I, Kapa, chief and son of chiefs! A bit of dirt! They sent me to school. They pitied me for being a poor, miserable black! The Missions, that is. The others only got all the work out of me they could. I was a thing to be pitied. I was a thing to be worked, like a horse. It was always one of those two things, and often both. I, Kapa! Oh, I tell you I got it in for whites . . . A year ago the chance came to come back home and I came. I found my father was dead, and I was the chief.

"The chief!" He laughed wildly. "Instead of pity, I had respect and fear. A thousand men to do what I told them. If I told one of those men there to kill himself, he would do it. "I'll show you, if you don't believe me. That's a bit different to what I've had for eighteen flamin' years.

"And now I've got a white woman!" Kapa continued. "A great bit of luck! My chance to even things up a bit with the whites! A white woman . . . No, it's no use threatening me with that pstol, mister, or you, either, with the rifle. She dies the moment you try anything. I've ordered it, and that's enough. She's here in the Sacred House, with armed men all about her. One crack with a club—savvy? You might shoot me, mister; but you can be damn' well certain you won't get the woman. I've fixed that."

Wade's blood ran suddenly hot. Stella was there in the Sacred House, only a few yards away! Despite Kapa's threat, an emotional impulse urged him to rush up that crazy ladder on to the platform and force his way inside the house. His muscles tensed themselves for the effort. He took a half-step forward. There was a cry of warning from O'Shane. Wade stopped.

(To be continued)

JURY PROBES DEATHS OF WOMEN

(Continued from Page 1)

her wrists and bathing her wound. Then she went into the kitchen and washed her hands. The blood there showed that she had touched the body of her friend.

For two hours, Mrs. Post had walked outside the bungalow, pacing the dirt road along which other homes are located at considerable intervals.

Finally, they belileve, Mrs. Post went back into the house and in a room separated by only half a partition from that in which her friend's body lay, sent a bullet through her brain.

No one except authorities was permitted to enter the house, which was placed under guard immediately after two friends, returning Mrs. Post's dog, which they had found in the downtown district, came upon the bodies.

Funeral services for Mrs. Palmer were arranged for Saturday afternoon, and burial for Ms. Post will be held an hour later in the same church, with burial in Glendale. Her mother is here and her divorced husband, Guy Bates Post, is in Honolulu.

Mrs. Palmer was extremely popular here. She and Mrs. Post had been close friends for three months. Their first quarrels are believed to have been caused by the appointment of Mrs. Palmer to paint scenery for the minstrel show which was to have been held last night. Mrs. Post was not selected to direct the performance, as she desired.

Five Injured In Berkeley Crash

BERKELEY, April 25.—UP—Five persons were injured in a head-on collision between two automobiles on Berkeley pier today. The occupants of both cars narrowly escaped death from drowning. The collision took place so near the edge of the pier that for the fraction of a second it was thought by onlookers that the cars might plunge into the bay.

Famed Driver Of Stage Coach Buried At L. A.

LOS ANGELES, April 25.—(UP)—Henry A. "Hank" Knight, who drove a Wells Fargo six-horse coach on the historic Vihginia City, Nevada to Placerville, California run in the '60's, was buried in Glendale today.

Born in Mitchell, Ontario, Canada, 82 years ago, he came to California when ne was but 20 years old.

He became a central figure in many aromantic western episode, and it was his boast that "I never lost a cent of anybody's money in all my years of coach driving."

On his run he was teamed with the historic Eugene Blair. Blair said "there never was a shotgun made that could drill a hole thru me." A bandit who held up the stage and fired two shots without warning, but missed his target and was shot down calmly by Blair, who leaped from the box of the coach and drilled him cleanly.

Residents Oppose Paving Of Tract

MARTINEZ, April 25.—Seeking to set aside the formation of a paving district, it was learned today that residents of the Mountain View tract have obtained an attorney and are planning to institute legal proceedings. The proposed improvement contemplates the aving of a dozen streets at an approximate cost of $45,000.

300 Engineers To Visit Span

MARTINEZ, April 25.—More than 300 engineers of the American Society of Engineers will be the guests of the Southern Pacific engineers at the $12,000,000 railroad bridge under construction between Martinez and Benicia tomorrow. The engineers will arrive at Benicia from Sacramento, where the annual convention of the society is being held.

Uses Same Collar Button 58 Years

LONDON—A Cope of Forest Hill, using the same front collar stud since 1882, bought four of the studs for a penny a street merchant in Cheapside.

Spinal Meningitis Closes Schools

NOGALES, Ariz., April 25.—(UP)—All Nogales schools were closed today as result of the seconnd death from spinal meningitis here within a week. Enrique Valenzuela, 7, died after an illness of several days. The first fatality occurred Monday with the death of a high school instructor. More than 1500 students are affected by the closing of the schools.

Local Firemen Will Dance At Eastshore Park

(Continued from Page 1)

have arranged for many pleasing things to eat and drink.

The checkroom has been remodeled and a large committee will be on hand to see that everyone is taken care of and that nothing will have a chance to astray.

Chief W. P. Cooper is chairman of the reception committee and all that attend are assured that they will be taken care of. A large delegation from the surrounding departments have promised to be on hand to help make the event a success. "Mac" of KFRC will also be there and those that have heard him can meet him face to face.

The committees in charge of the affair are:

General chairman: A. M. Buys.

Reception committee: Chief W. P. Cooper, chairman; L. E. Lavenue, J. R. Patnott, R. L. Heath G. H. Evans.

Publicity committee: Assistant Chief J. J. Barry, chairman; J. R. Patterson.

Many Enjoy DeMolay Show

Despite the inclement weather, a fair sized crowd attended the 3-act comedy, 'So This Is London" presented in the Roosevelt auditorium last night, under the auspices of Richmond chapter, Order of De Molay.

Miss Jean Moyle, of Richmond, and a member of the Faucit School of the Theatre, which presented the play, gave an accomplished performance in her role of Lady Ducksworth.

Music was supplied between the acts by the Vivace orchestra.

The scenes take place in England, whre a Yankee family is visiting. The various thoughts and impressions of the Americans and their English cousins caused considerable hilarity among the audience.

Man Suffers Hand Injury

Louis Polesia, 430 Critchett avenue is today nursing a badly crushed hand, the result of an accident while working at the Rheem Manufacturing company yesterday. He was treated at the Hospital Richmond.

GREAT FUTURE FOR RICHMOND SEEN

With national industrial leaders centering their heaviest investments and improved projects in Richmond, the published plans of the new $5,000,000 Ford plant, a gigantic harbor expansion program outlined and the report that Bethlehem Steel is considering a location here, the business world in general, and those interested in real estate in particular, are acutely aware that this progressive city is destined to be the scene of the greatest activity on the Pacific coast in the immediate future.

The strategic location of Richmond, on a direct line with the Golden Gate, and its harbor tonnage, proclaiming it a metropolitan port tapping the vast untouched markets of the Orient, places Richmond amongst the first rank of Pacific coast industrial cities. That those men and firms with millions already invested are cognizant of the fact that more millions will be attracted to Richmond, that the public, so to speak, is centered here, is confirmed by the progressive improvement programs of Santa Fe, Parr, the Berkeley Waterfront company and others.

Ford has already put down test piles, and the Berkeley Waterfront company will spend $700,000 on the creation of an industrial tract of 241 acres on the inner harbor. A 400 foot channel, approximately 7260 feet long and 18 feet deep will be dredged. Santa Fe is spending $300,000 on the creation of another industrial tract and the dredging and widening in Ellis slough with a turning basn at the end. Parrs' terminals at the Ford site are already completed as is the widening of the inner harbor here.

That industrial activity of such magnitude as is anticipated by the above projects will have a strong reaction on real estate values, goes almost without saying. Richmond is a city with a "spot in the sun" and the greatness of its destiny is beyond ordinary imagination.

Metropolitan Square, the C. P. Murdock, Incorporated property opposite the civic center and located at Twenty-third street and Macdonald avenue, is the coming business center. Richmond's present business district, bounded on two sides by the Santa Fe and Southern Pacific tracks, and on the west by the bay, can only expand to the east, and directly in the path of this Metropolitan Square. Here, to, the stage is set, and the wise investor will secure some of this property while prices are low.

Mrs. Eva Kooy Rites Monday

Funeral services for Mrs. Eva Kooy, 325 Clayton avenue, El Cerrito, who died yesterday morning after a lingering illness ,will be held under direction of Wilson and Kratzer from Sunset View chapel Monday afternoon at 1:30.

She was the wife of Nicholas Kooy and mother of Gerrit Kooy, both of El Cerrito. Deceased was a native of Holland and was 56 years of age. She has lived in California 20 years, and El Cerrito 15.

Revival To Be Continued Another Week

By special request the revival meetings at the Pentecostal Full Gospel church, which have been continuing with unabating interest, will be held for one more week, every evening at 7:45 p. m., except for Monday.

The evangelists will speak twice on Sunday at 11 a. m., and at 7:45 p. m.

Thursday evening Guy Renfrow will speak on "Divine Healing," and will give his personal testimony of a remarkable healing of tuberculosis of the bone, chronic stomach trouble, mastoid and of pleural pneumonia.

Four Burned In Oil Blast

PORT ARTHUR, Tex., April 25.—UP—Killed when a still in Texas Company refinery here exploded, bodies of three men, charred almost beyond recognition, were recovered late today.

A fourth man, believed to be fatally burned, was pulled from the burning still.

Bodies of P. Kebodeaux, 39, a still celaner, C. C. Wilburn, 26, and Claude Brossard, 35 still workers, were pitched into electric power wires above the still tower.

Rene Herbert, 28, who saved himself from certain death when he threw a huge bucket he was carrying over his head and shoulders, probably will die, physicians said tonight. He was unconscious when removed from the fire.

A break in the vapor line leading to the power still cleaner is believed to have caused the explosion.

El Cerrito Lions To Be Entertained

A one act farce, "Kleptomaniac" will be presented for the El Cerrito Lions club May 7 at the Fairmont school by a group of young women from the Prentation Convent in Berkeley. Two El Cerrito girls, Jean Eakle and Camille Sirard, are in the cast.

L. A. Sirard is directing the play, and the committee in charge of the evening consists of Blake McNeil, S. M. Evanson and Steve Pertone. Other entertainment and dancing is also scheduled.

El Cerrito Census Shows Increase

With a few scattering reports yet to be turned in, a total of 3852 people have been counted in the El Cerrito census enumeration according to Edward Dinklespiel, census supervisor. It is believed that final figures will reach around 4000.

According to the figures to date, El Cerrito has increased in population in the past 10 years by almost 200 percent.

FILIPELLI TO BE PAROLED

John Filipelli, Oakland bail bond broker, whose name was mentioned in connection with the mysterious death of Tony Giosso here, may gain his release from McNeill Island prison within four months, according to press dispatches received here from Washington.

It was revealed that the fedral parole board has recommended Filipeli's parole August 8, one year from the date he started serving a two year sentence.

Filipelli is alleged to have been the master mind of the sensational Eastbay beer racket which was exposed a year ago.

Rickshaws Boom In Tram Strike

SHANGHAI, April 25.—UP—With the entire tram system paralyzed by a strike of 700 of its motormen and conductors, the rickshaw and automobile came into its own today. Officials were in a quandry as to the cause of the strike, men having walked out without notice or presenting their demands. Aggravating the situation was a strike of autobus chauffeurs and conductors.
